Installation Prerequisites

System Requirements :

Microsoft Windows SharePoint Service 3.0, Microsoft Office SharePoint Server 2007, SharePoint Foundation 2010 or SharePoint Server 2010.

Supported Browser:

- Internet Explorer 6, 7, 8
- FireFox 3.0+
- Safari 3.0+
- Chrome

Language Support:

- English

Installation Procedure

The List Search installation package contains the installation folders for the following three components: List Search, SharePoint License Manager Installation, and Product Activation Tool Installation.

Name	Date modified	Type
 FireArrow.License1.0.0.0	9/5/2011 9:08 AM	File folder
 ListSearch1.0.0.0	1/19/2012 3:10 PM	File folder
 ProductActivation1.0.6	9/5/2011 9:08 AM	File folder
 ListSearch_Manual.pdf	1/19/2012 8:42 AM	Adobe Acrobat D...

1. License Manager Installation

The License Manager is only required to install once on a server. If you have already installed it with other FireArrow products before, you can skip the installation steps but need to ensure it is deployed globally. To verify the installation and deployment, follow below steps:

1. Log into the SharePoint Central Administration. Go to the “System Settings” and select “Manage farm Solutions” under the “Farm Management” section.

Farm Management

[Configure alternate access mappings](#) | [Manage farm features](#) |

[Manage farm solutions](#) | [Manage user solutions](#) |

[Configure privacy options](#) | [Configure cross-firewall access zone](#)

[Deploy or retract solution packages across the farm](#)

2. Check if “firearrow.sharepoint.license.wsp” is in the solution list or not. If it is, it means License Manager has been already installed. If not, please skip to the next section to install the License Manager.

firearrow.sharepoint.advancedrssviewer.wsp	Deployed	http://sp2010test.env.firearrowsoft.com/
firearrow.sharepoint.license.wsp	Deployed	Globally deployed.
firearrow.sharepoint.livebanner.wsp	Deployed	http://sp2010test.env.firearrowsoft.com/

Note: During the installation process, the license manager solution is deployed globally.

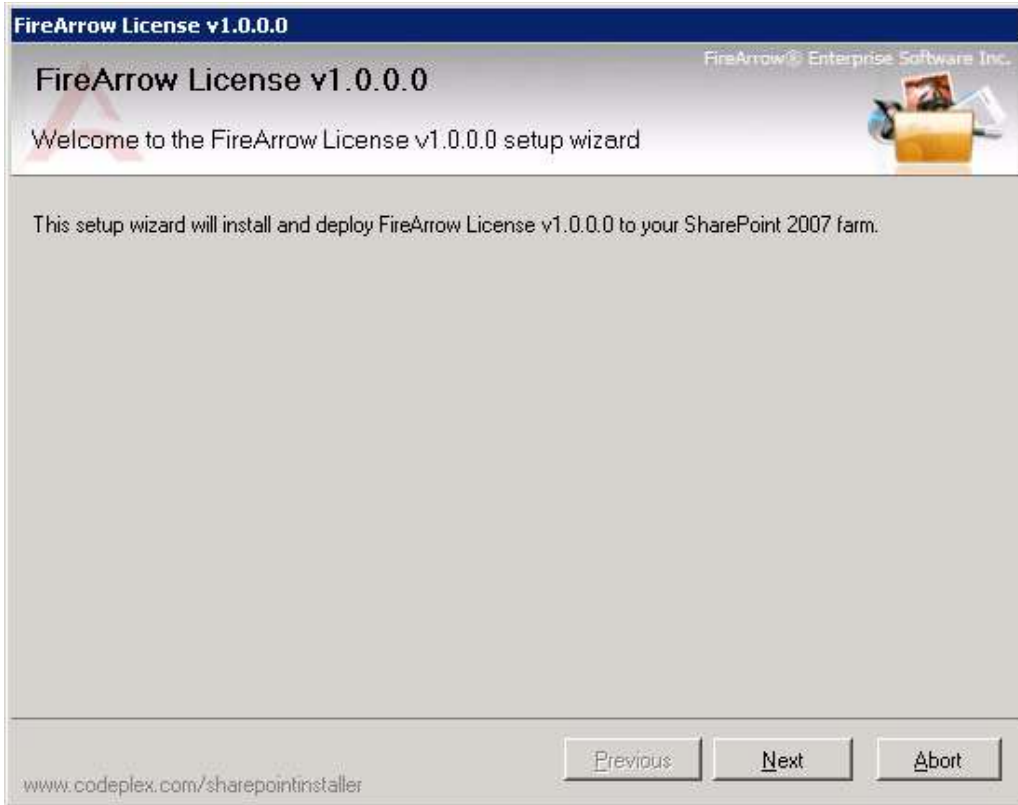

License Manager Installation Steps:

The steps to install the License Manager are as followed. You must be the *SharePoint Farm Administrator* for a successful installation.

1. Open the folder for License Manager Installation and run “Setup.exe”.

Name	Date modified	Type	Size
 banner	4/18/2010 5:08 PM	JPEG image	17 KB
 EULA	7/13/2009 9:36 AM	Rich Text Format	10 KB
 FireArrow.SharePoint.License	8/25/2010 2:41 PM	WSP File	33 KB
 Setup	4/1/2010 3:18 AM	Application	387 KB
 Setup.exe	8/15/2010 11:54 PM	CONFIG File	1 KB

2. The setup wizard will be displayed. Click “Next” to proceed.

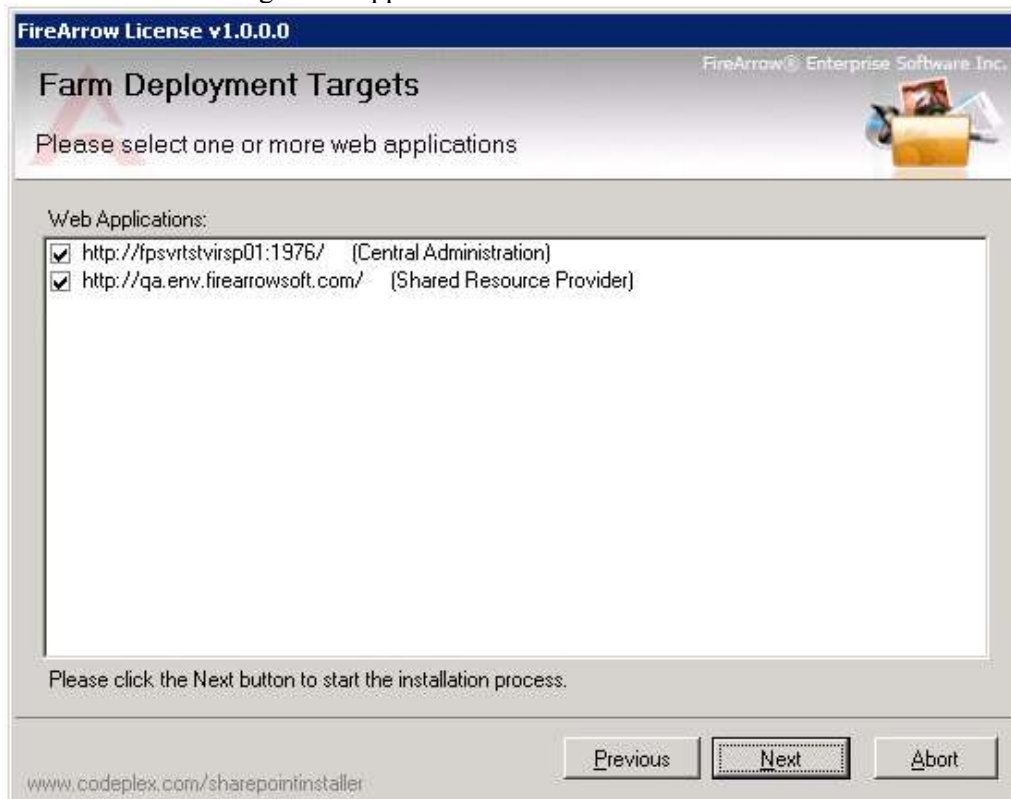

3. Wait for system check to complete and then click “Next”.

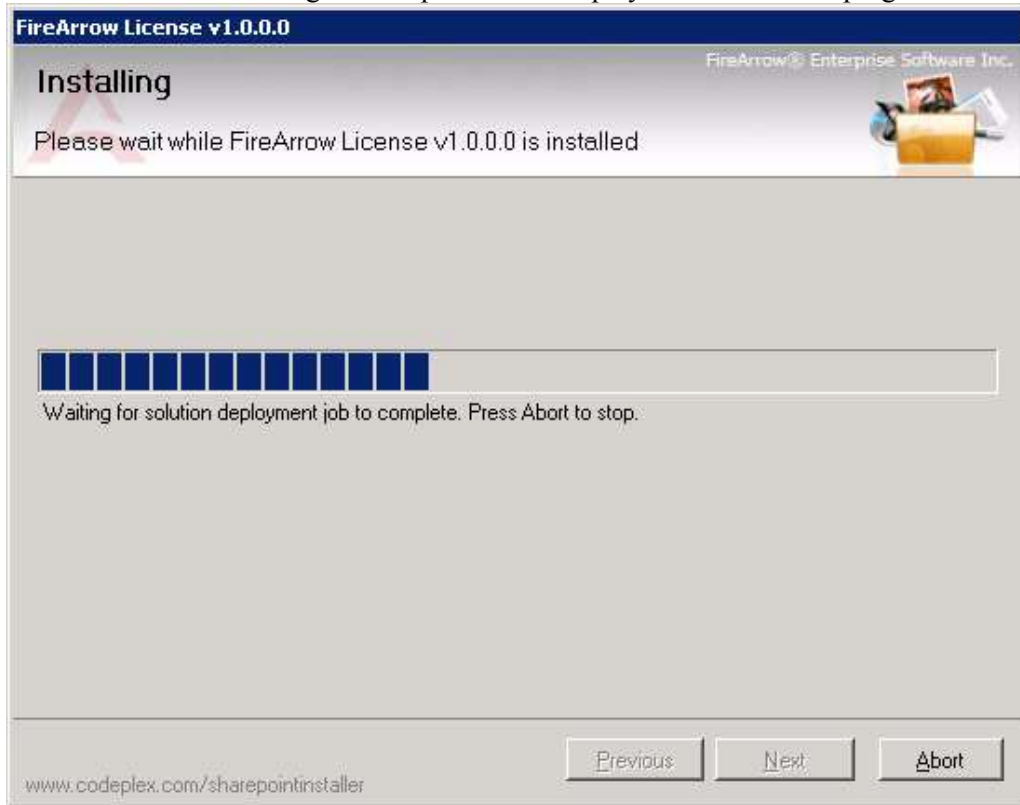

4. After you have read and accepted the License Agreement, click “Next” to continue.

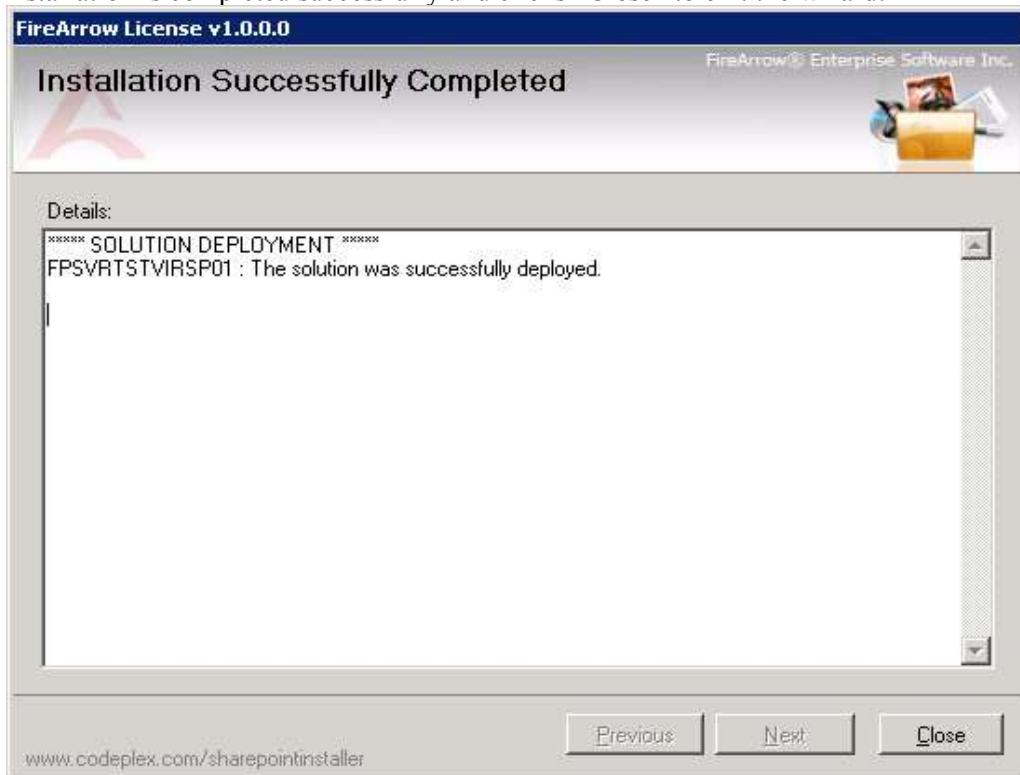

5. Select one or more target web applications and then click "Next".

6. The wizard starts installing the component and displays the installation progress.

7. Installation is completed successfully and clicks "Close" to exit the wizard.

2. Product Activation Tool Installation

The Product Activation Tool will be used to activate FireArrow products. Just like the License Manager, it is also only required to install once on a server.

- Open the folder for Product Activation installation and run “Setup.exe”.

Name	Date modified	Type	Size
 FireArrow.ProductActionvation.Installer	8/25/2010 4:05 PM	Windows Installer ...	537 KB
 FireArrow.ProductActivation	8/25/2010 4:05 PM	Application	184 KB
 FireArrow.ProductActivation.RunAs	8/25/2010 4:05 PM	Application	76 KB
 setup	8/25/2010 4:05 PM	Application	421 KB

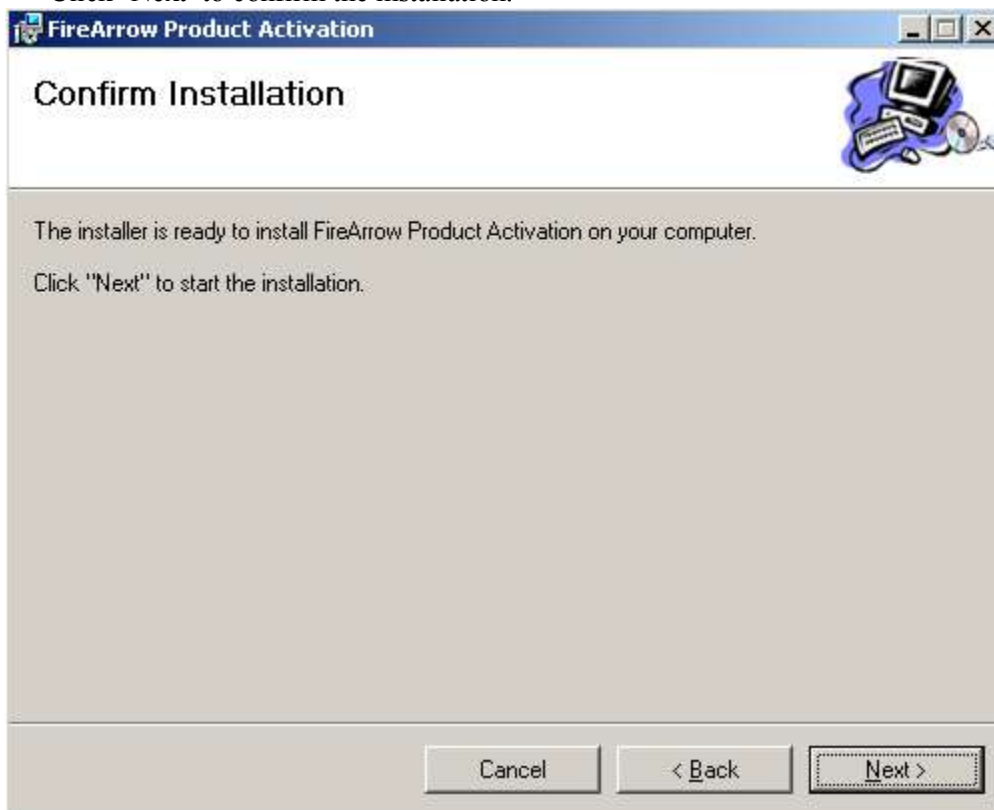

- The setup wizard will be displayed and click “Next” to proceed.

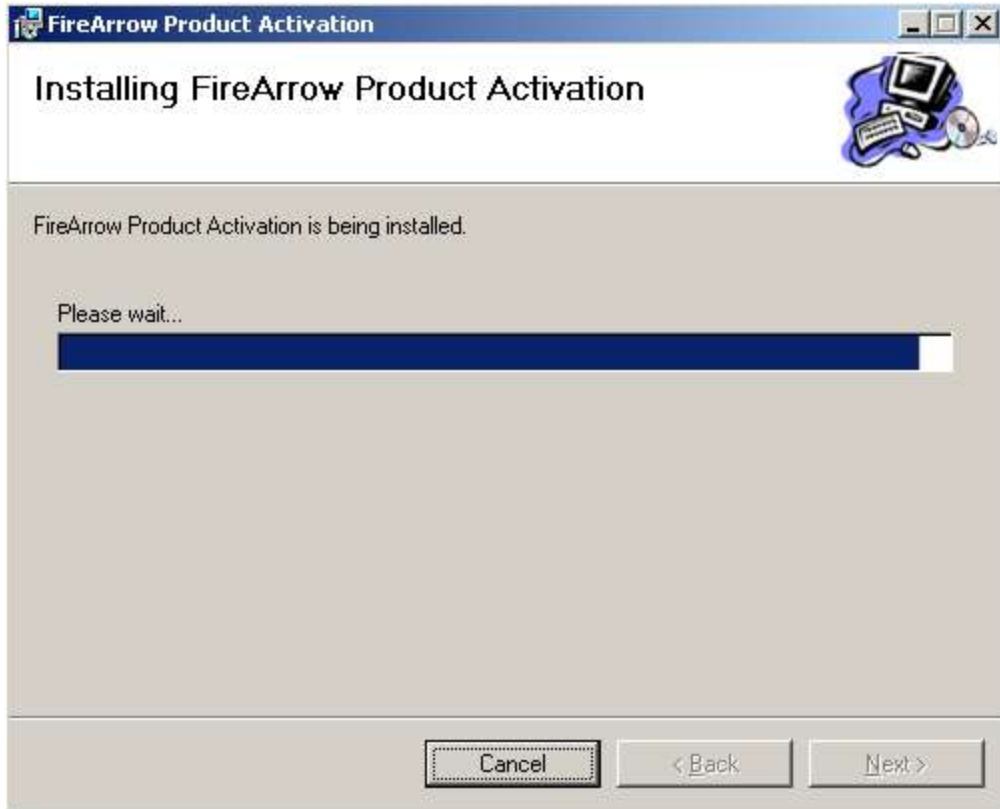

- Select the installation folder, and click ‘Next’.

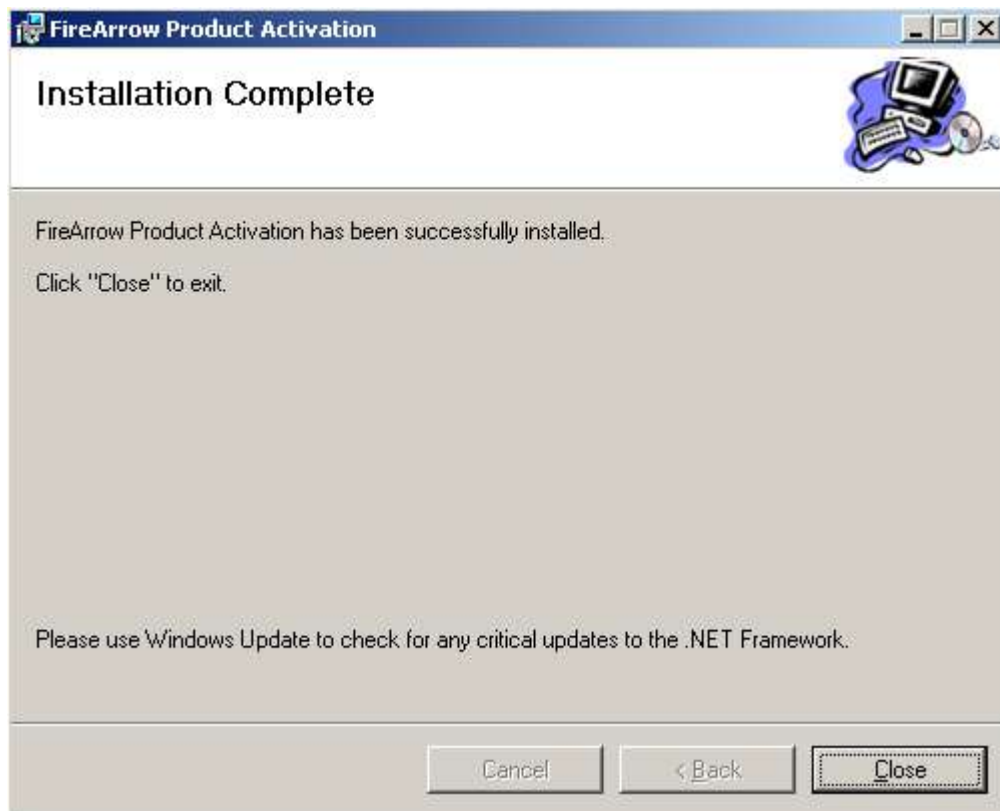

- Click 'Next' to confirm the installation.

- The wizard starts the installation and display the installation progress.

- Installation is completed successfully and clicks “Close” to exit the wizard.

3. List Search Installation

There are two installation approaches. One is to use the installation wizard for automatic installation. The other way is to use STSADM command tool for manual installation. This section describes both approaches in detail.

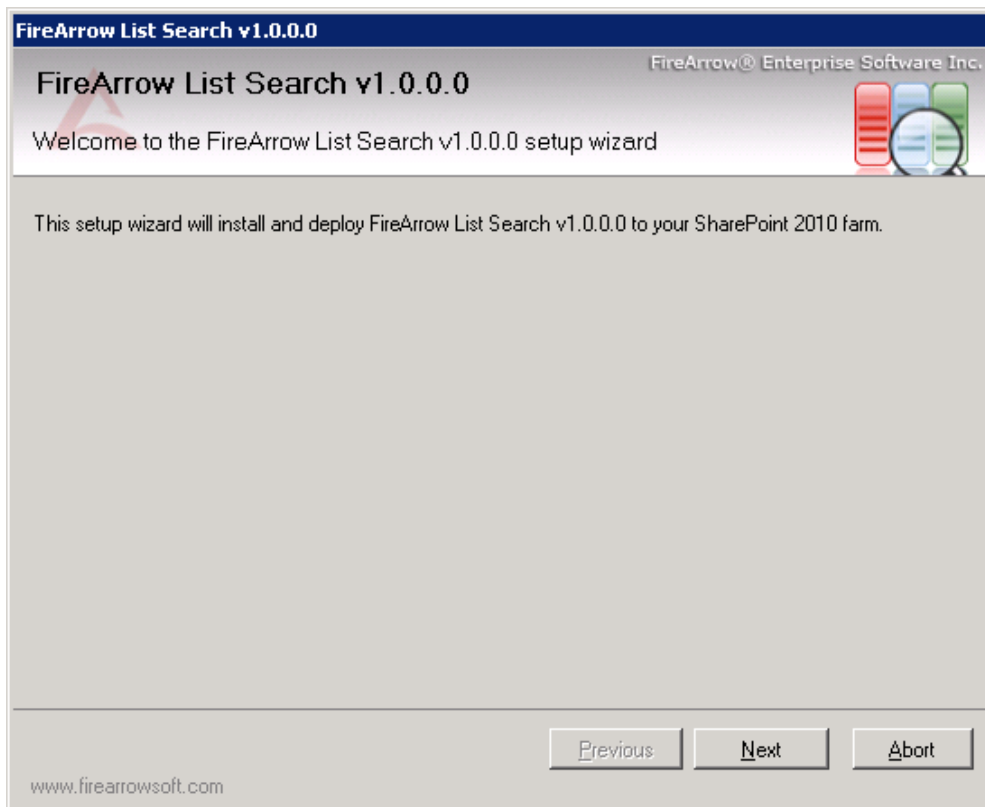

Automatic Installation Approach

The software installation package contains the installer file, solution package file, image, and etc. You must be the *SharePoint Farm Administrator* for the successful installation. The steps are as follows.

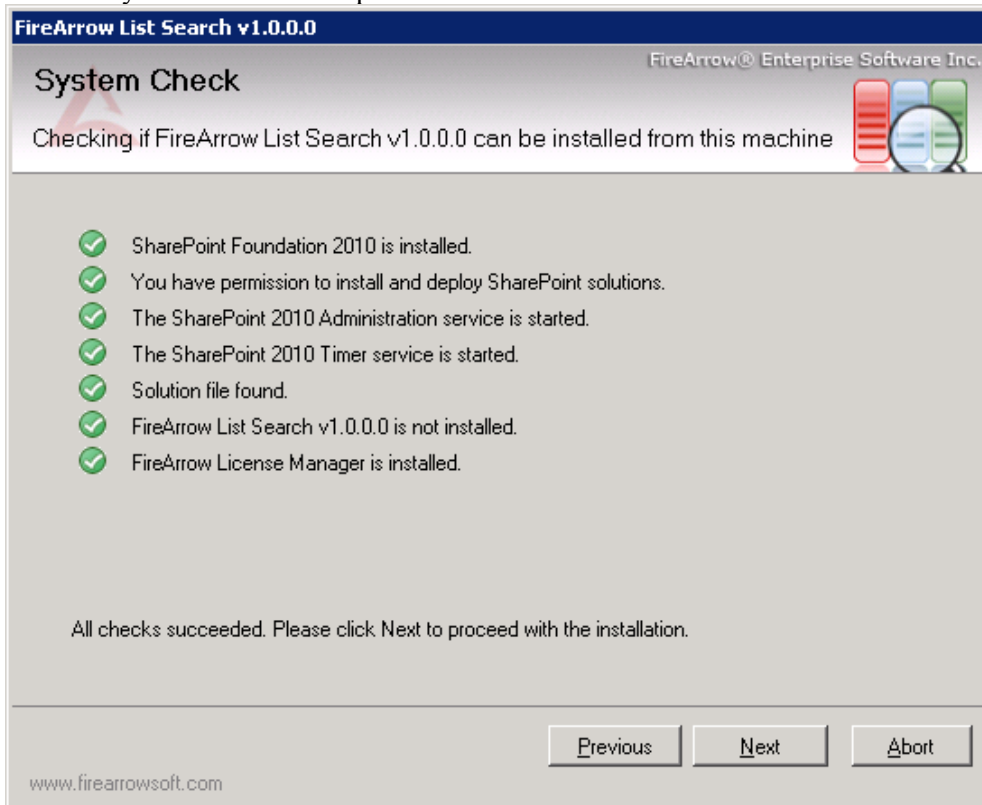

- Open the folder for List Search installation and double-click the “Setup.exe” to start the installation.

Name	Date modified	Type
 banner.jpg	1/5/2012 1:47 PM	JPEG image
 EULA.rtf	7/13/2009 8:36 AM	Rich Text Format
 FireArrow.SharePoint.ListSearch.wsp	1/18/2012 5:02 PM	WSP File
 Setup.exe	1/13/2011 12:47 AM	Application
 Setup.exe.config	1/11/2012 9:45 AM	CONFIG File

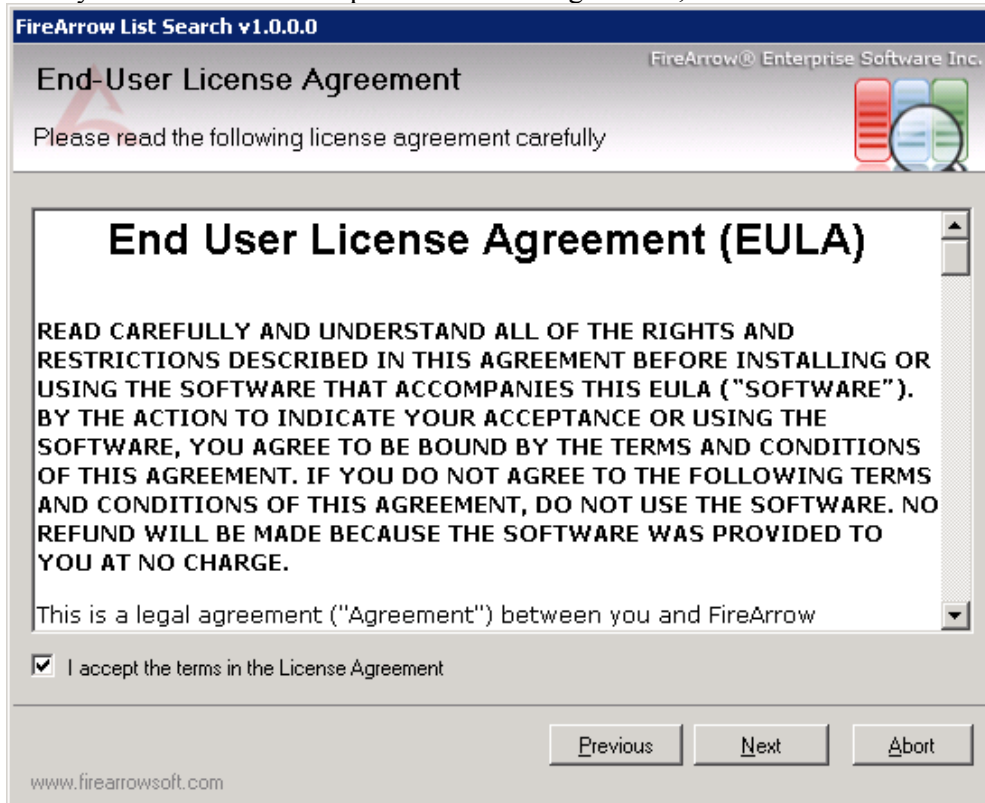

- The setup wizard will be displayed. Click “Next” to proceed.

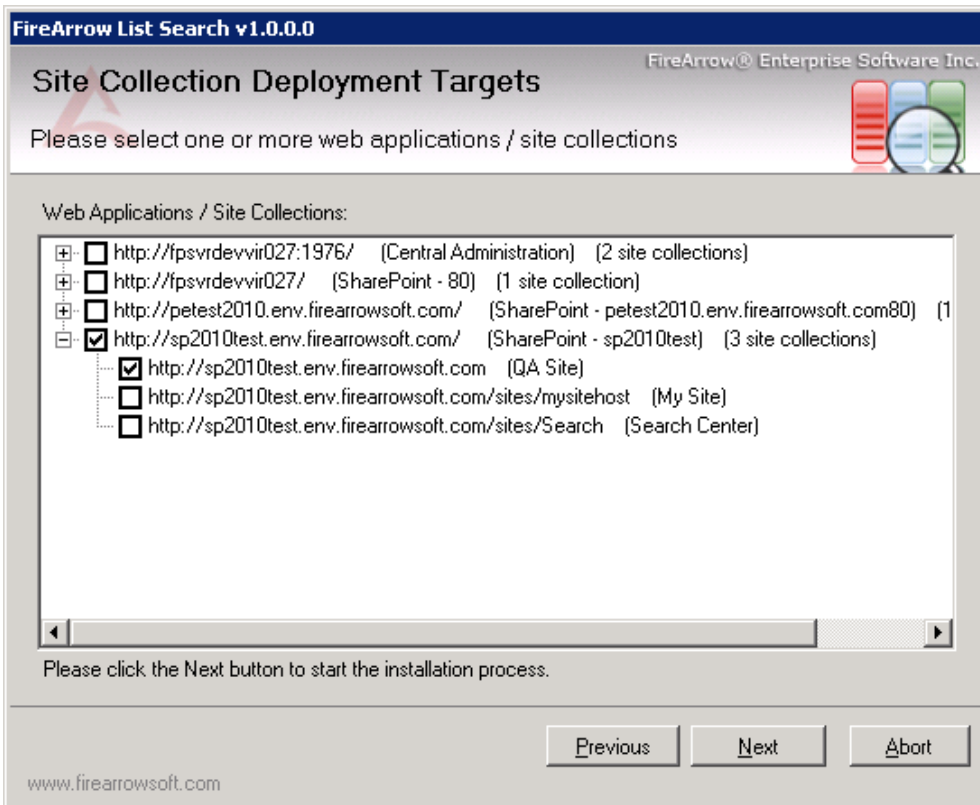

- Wait for system check to complete and then click “Next”.

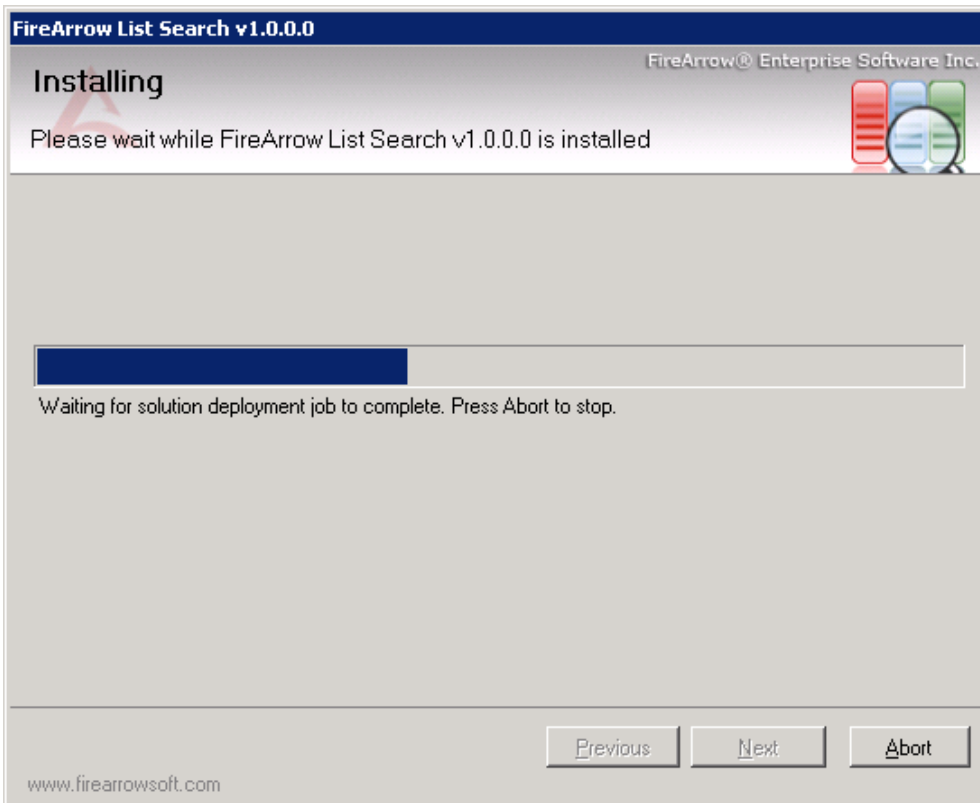

- After you have read and accepted the License Agreement, click “Next” to continue.

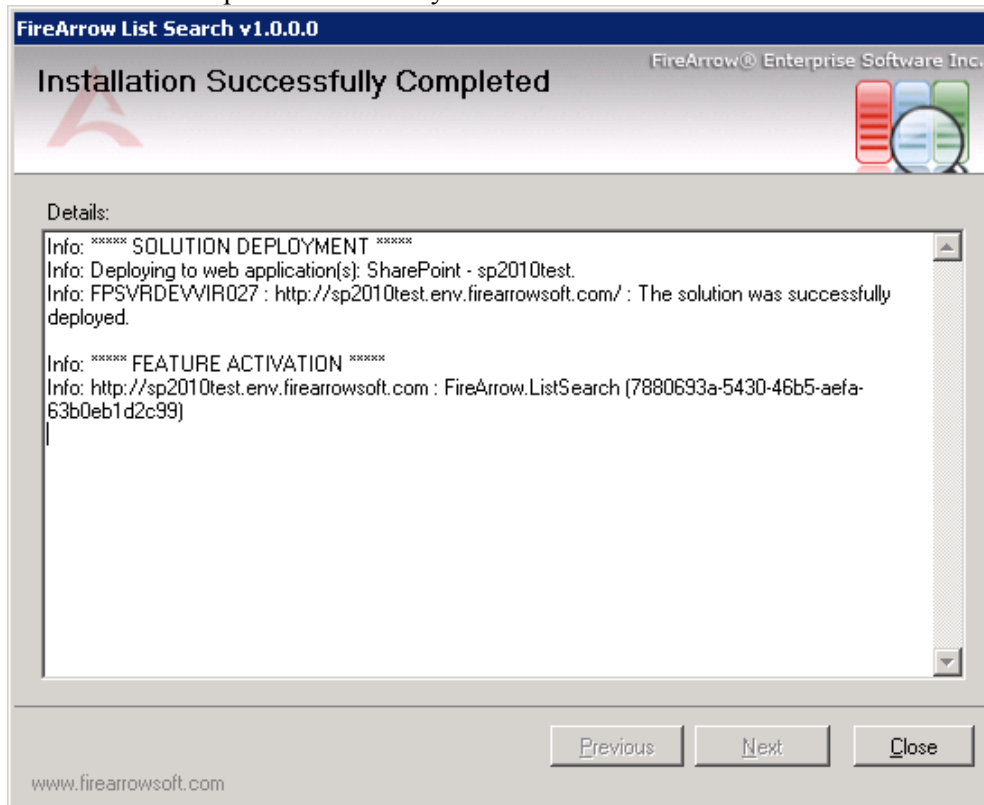

- Select one or more target web applications and then click "Next".

- The wizard starts installing the solution and display the installation progress.

- Installation is completed successfully and clicks “Close” to exit the wizard.

- After installation, run the command “`iisreset /noforce`” to restart IIS.

Manual Installation Approach

The folder for List Search installation contains the solution package which you need for manual installation.

Name	Date modified	Type
banner.jpg	1/5/2012 1:47 PM	JPEG image
EULA.rtf	7/13/2009 8:36 AM	Rich Text Format
FireArrow.SharePoint.ListSearch.wsp	1/18/2012 5:02 PM	WSP File
Setup.exe	1/13/2011 12:47 AM	Application
Setup.exe.config	1/11/2012 9:45 AM	CONFIG File

The steps for manual installation are as follows:

1. Copy the solution package to the server farm and run following commands to add the solution to the server farm:
`stsadm.exe -o addsolution -filename "FireArrow.SharePoint.ListSearch.wsp"`
`stsadm -o execadmsvcjobs`
2. Then you need to deploy the solution package. You can deploy the solution package either by running STSADM commands or using the SharePoint 3.0 Central Administration web

interface.

- **Option 1: STSADM commands**

You need to run the following two commands for solution deployment:

- 1) stsadm -o deploySolution -name "FireArrow.SharePoint.ListSearch.wsp" -immediate -url http://qa.test.FireArrowsoft.com -force -allowCasPolicies

Note: Please replace the url (http://qa.test.firearrowsoft.com) with your target web application's url.

- 2) stsadm -o execadmsvcjobs

- **Option 2: SharePoint 3.0 Central Administration:**

- 1) Open Central Administration, select Operations, and select Solution management under the Global Configuration.

- 2) Select the solution "FireArrow.SharePoint.ListSearch.wsp", and then select Deploy Solution from the Solution Properties.

Solution Information

Information on the solution you have chosen to deploy.

Name:	firearrow.sharepoint.listsearch.wsp
Locale:	0
Deployed To:	None
Deployment Status:	

Deploy When?

A timer job is created to deploy this solution. Please specify the time at which you want this solution to be deployed.

Choose when to deploy the solution:

Now

At a specified time:

1/16/2012 4 PM 00

Deploy To?

The solution contains Web application scoped resources and should be deployed to specific Web applications. Please choose the Web application where you want the solution to be deployed.

Choose a Web application to deploy this solution:

http://sp2010test.env.firearrowsoft.com/

Warning: This solution contains a Code Access Security policy. Deploying this solution will change the effective trust policy. Do not proceed unless you trust the solution provider.

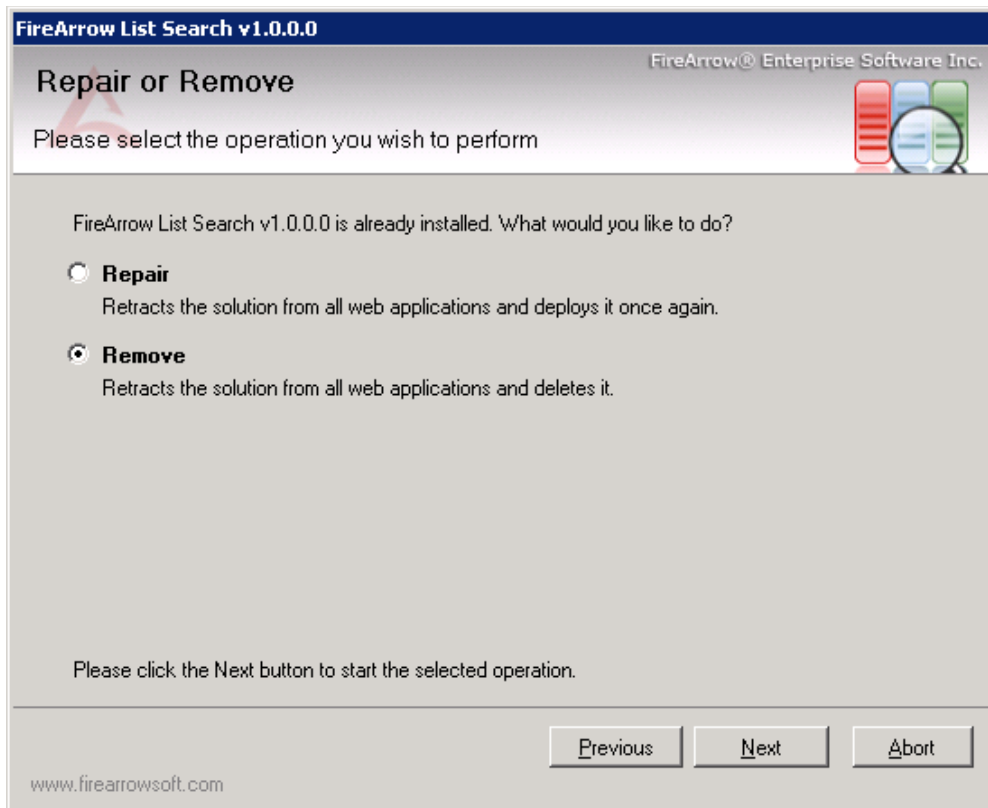

OK Cancel

- After the solution is deployed to target web application, run the command `iisreset /noforce` to restart IIS.

Un-installation

You can use the installer to uninstall the List Search. The steps to uninstall it are as follows.

- 1) Run the setup.exe.
- 2) Select the radio button for “Remove” and click “Next”, the solution will be uninstalled from the system.

License Management

The FireArrow List Search is allowed to use for 30-days after the installation without license activation. It is always recommended to provision your valid license activation key immediately after the installation is completed. Please go to the FireArrow web site (<http://www.firearrowsoft.com>) to purchase the software in order to obtain the license activation key.

After the software purchase, please email us (support@firearrowsoft.com) the following information in order to generate the product activation code:

- Product key
- Order confirmation #

We will email you the product activation key.

You can obtain the product key information through the Product Activation Tool. Please follow the steps in below section to obtain the product key and complete the license activation.

License Activation

After the Product Activation Manager is successfully installed, follow below steps to obtain the product key information and activate the FireArrow product license in your server.

- Go to “Start” menu→All Programs→FireArrow Software→Product Activation Tool and click “FireArrow Product Activation Tool”.

- Select the ‘FireArrow List Search’ from the product dropdown list and the corresponding product information will be displayed in the form, including the “Product Key” information. You can also see the license status from the “Status” field. Before activation, the status will indicate you are using a trial version.

FireArrow Product Activation

Logon as: FPSPTRN\SPAdmin Is Farm Administrator

Select a product: FireArrow List Search

Description: Offers enhanced search capabilities against lists and document libraries.

Version: 1.0.0.0

Select a edition: Standard

Select a license: Server

Select a server: FPSVRDEWIR027

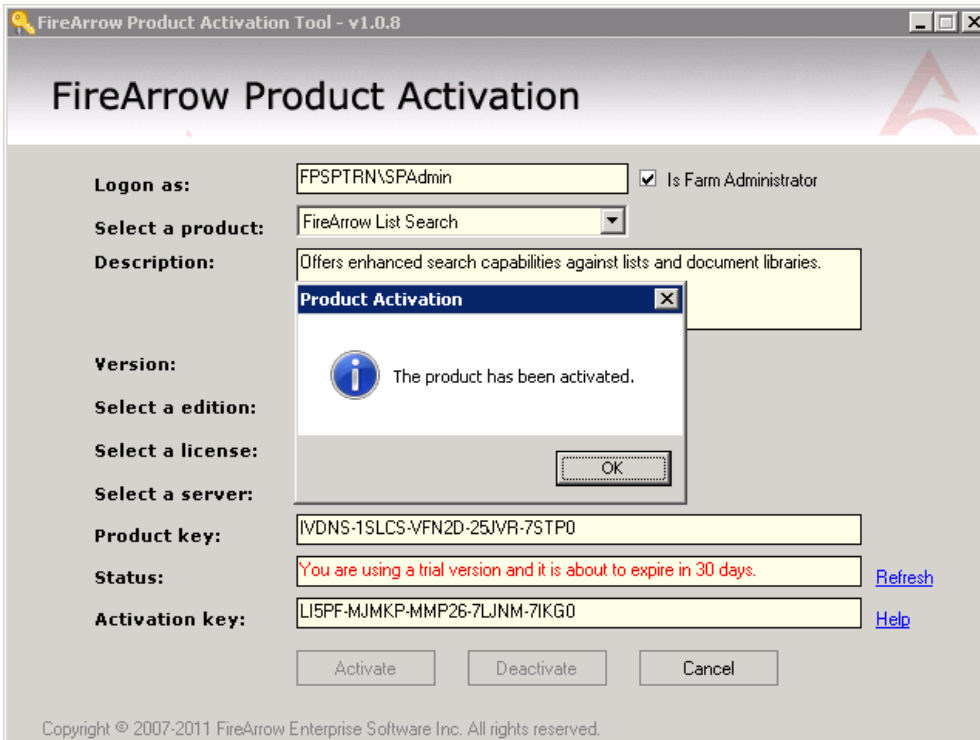

Product key: IVDNS-1SLCS-VFN2D-25JVR-7STP0

Status: You are using a trial version and it is about to expire in 30 days. [Refresh](#)

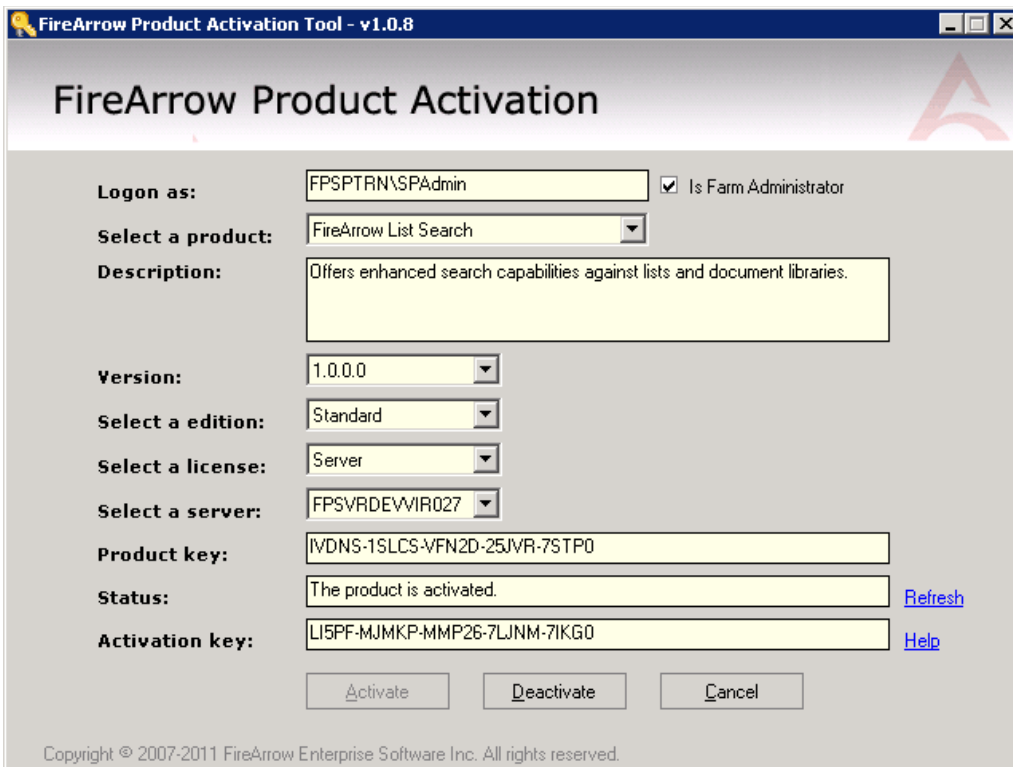

Activation key: [Help](#)

Copyright © 2007-2011 FireArrow Enterprise Software Inc. All rights reserved.

- Once you get the Activation Key, enter it into the ‘Activation Key’ field, and click ‘Activate’ button.

- Click OK in the pop-up window to confirm the activation. And you will notice that the message in the Status field is changed to “The product is activated”. The product activation is completed.
