# Chapter 1: Introduction

---

FireArrow News Rotator Web Part enables you to display headline news stories within the same area of a SharePoint page easily. It provides several popular display styles with easy way to navigate through news stories and links to detail pages. It also offers a lot rich features such as flexible configurations, cool transition effects and auto-display features, etc.

## Key Feature List:

- ✓ Display and rotate headline stories stored in SharePoint list
- ✓ Four elegant display styles
- ✓ Configurable navigation
- ✓ Adjustable display size and alignment
- ✓ Cool transition effects
- ✓ Set transition effect interval time
- ✓ Auto-play mode to rotate news automatically
- ✓ Set auto-play speed
- ✓ Configurable mapping to display news property information
- ✓ Add associated hyperlink
- ✓ Adjustable navigation alignment for selected style
- ✓ Adjustable text area size and alignment for selected style
- ✓ Support displaying images from picture/document library
- ✓ Support SharePoint 2007 & 2010

## Release Notes:

The latest product release is version 1.0.0.0

## About This Guide:

This guide covers the information you need to install and use the News Rotator web part. It walks you through the process of installing and activating the web part in your SharePoint environment. In addition, it describes the configuration options and features provided by the web part in detail.

# Chapter 2: Installation Guide

---

## 1. Installation Prerequisites

### System Requirements :

- Microsoft Windows SharePoint Service 3.0
- Microsoft Office SharePoint Server 2007
- SharePoint 2010 Foundation or SharePoint 2010 Server

### Supported Browser:

- Internet Explorer 6, 7, 8
- FireFox 3.0+
- Safari 4.0+
- Chrome

### Language Support:

1. English

## 2. Installation Procedure

The News Rotator installation package contains the installation files for the following three components: License Manager Installation, News Rotator web part installation and Product Activation Tool Installation.

Name	Date modified	Type
 FireArrow.License1.0.0.0	2/25/2011 3:45 PM	File folder
 NewsRotator1.0.0.0	2/25/2011 3:45 PM	File folder
 ProductActivation1.0.8	2/25/2011 3:45 PM	File folder
 News_Rotator_ManualV1	2/25/2011 3:54 PM	Adobe Acrobat D...

### License Manager Installation

The License Manager is only required to install once on a server. If you have already installed it with other FireArrow products before, you can skip the installation steps but need to ensure it is deployed globally. To verify the installation and deployment, follow below steps:

1. Log into the SharePoint Central Administration. Go to the “System Settings” and select “Manage farm Solutions” under the “Farm Management” section.

#### Farm Management

[Configure alternate access mappings](#) | [Manage farm features](#) |

[Manage farm solutions](#) | [Manage user solutions](#) |

[Configure privacy options](#) | [Configure cross-firewall access zone](#)

[Deploy or retract solution packages across the farm](#)

- Check if “firearrow.sharepoint.license.wsp” is in the solution list or not. If it is, it means License Manager has been already installed. If not, please skip to the next section to install the License Manager.

firearrow.sharepoint.advancedrssviewer.wsp	Deployed	http://sp2010test.env.firearrowsoft.com/
firearrow.sharepoint.license.wsp	Deployed	Globally deployed.
firearrow.sharepoint.livebanner.wsp	Deployed	http://sp2010test.env.firearrowsoft.com/

Note: During the installation process, the license manager solution is deployed globally

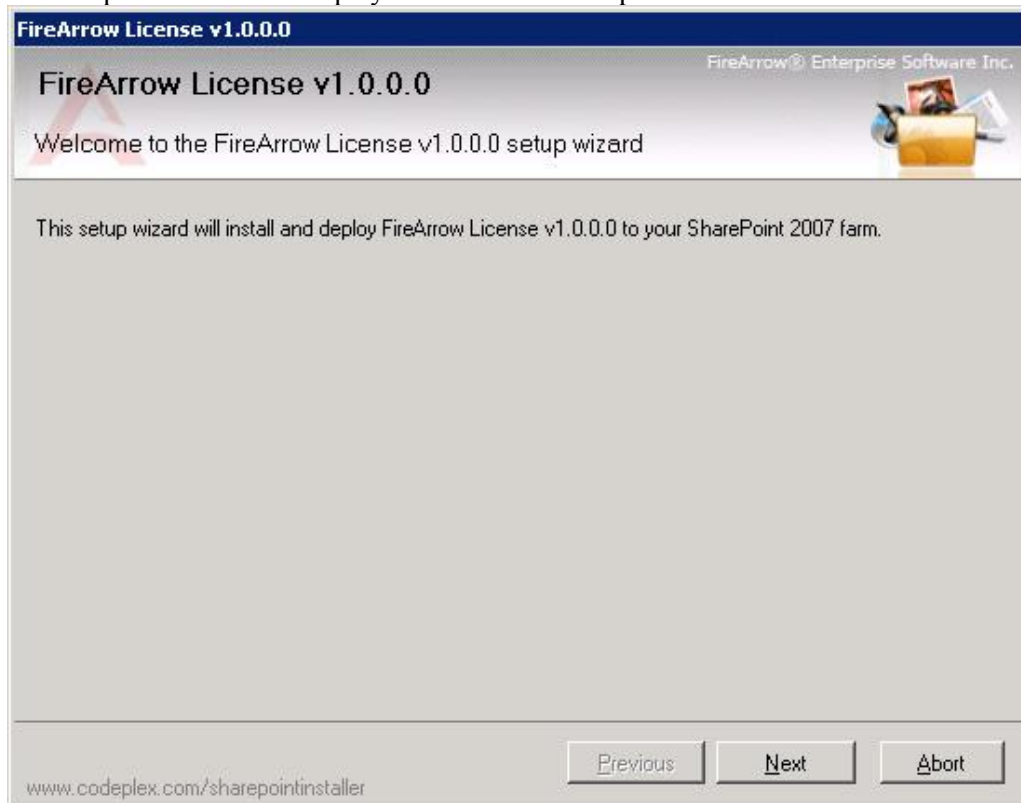

### ***License Manager Installation Steps:***

The steps to install the License Manager are as followed. You must be the SharePoint Farm Administrator for a successful installation.

- Open the folder for License Manager Installation and run “Setup.exe”.

Name	Date modified	Type	Size
 banner	4/18/2010 5:08 PM	JPEG image	17 KB
 EULA	7/13/2009 9:36 AM	Rich Text Format	10 KB
 FireArrow.SharePoint.License	8/25/2010 2:41 PM	WSP File	33 KB
 Setup	4/1/2010 3:18 AM	Application	387 KB
 Setup.exe	8/15/2010 11:54 PM	CONFIG File	1 KB

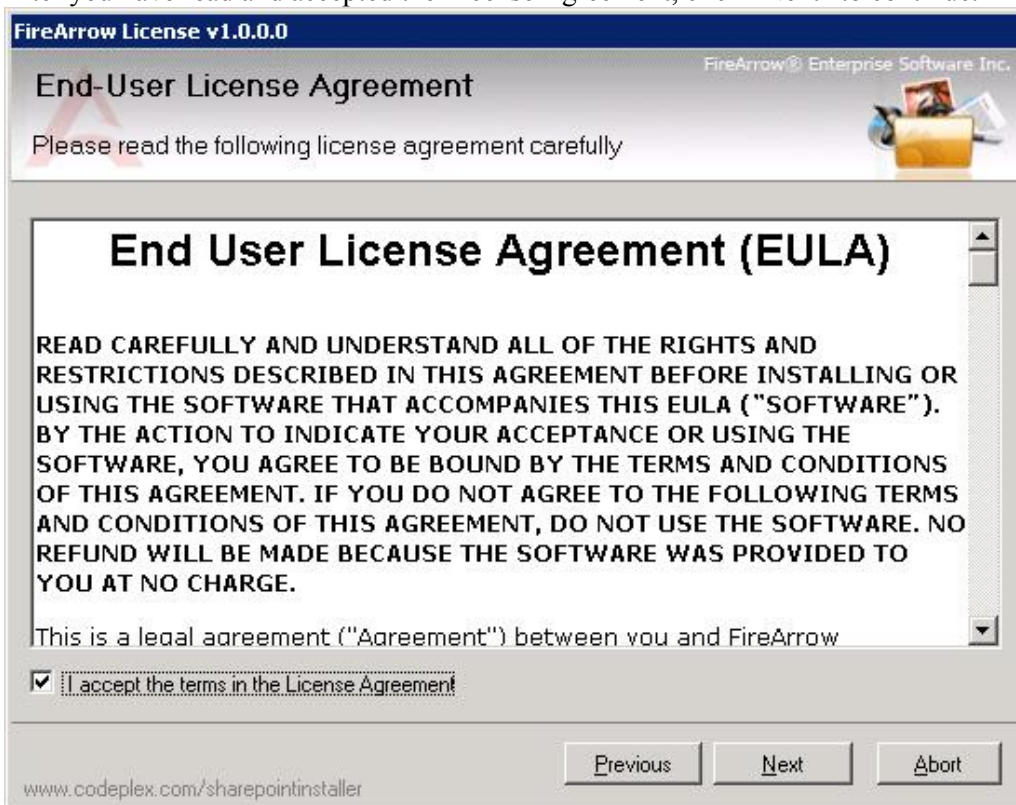

- The setup wizard will be displayed. Click “Next” to proceed.

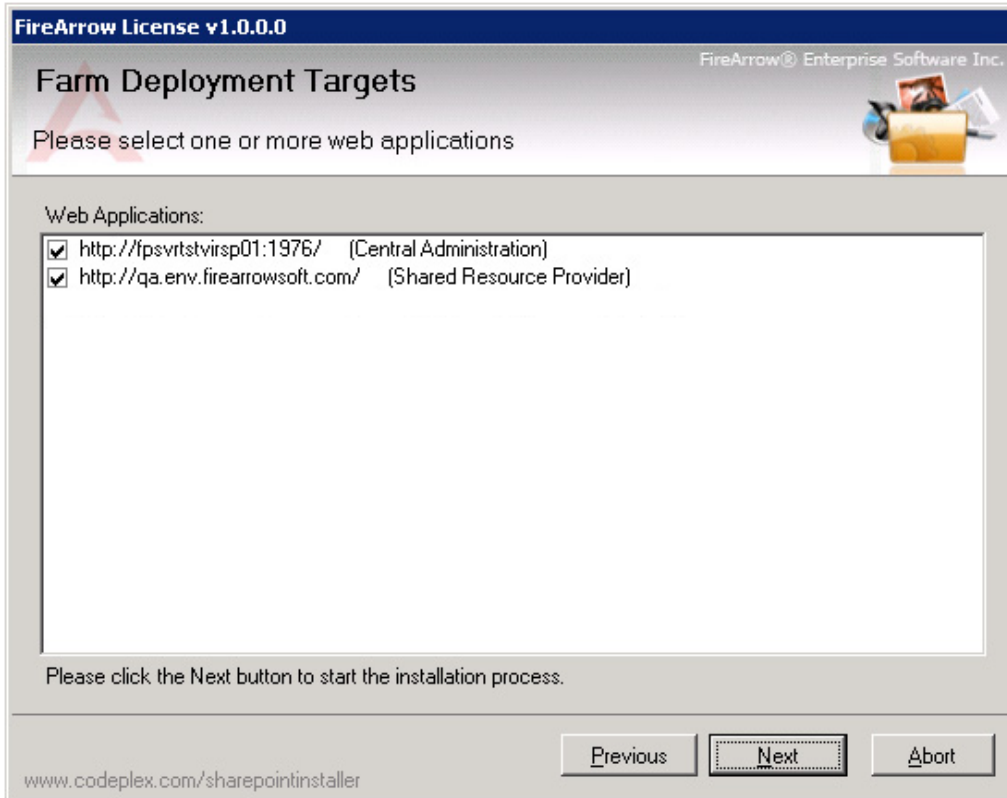

3. Wait for system check to complete and then click "Next".

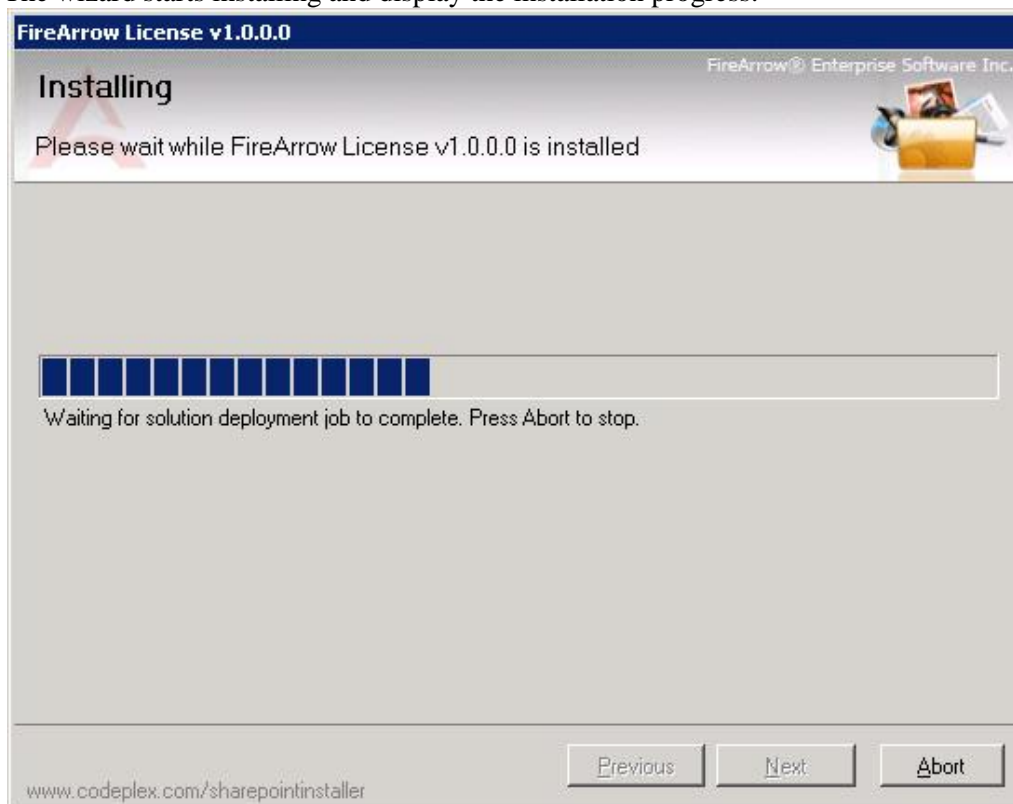

4. After you have read and accepted the License Agreement, click "Next" to continue.

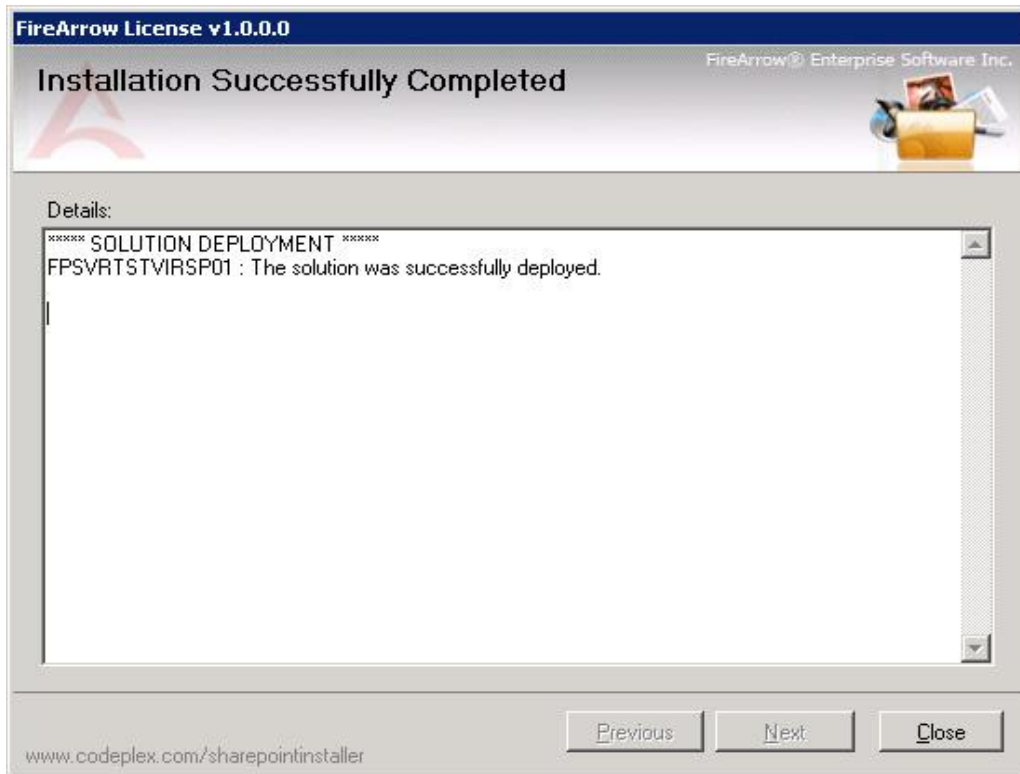

5. Select one or more target web applications and then click "Next".

- The wizard starts installing and display the installation progress.

- Installation is completed successfully and clicks "Close" to exit the wizard.

## Product Activation Tool Installation

The Product Activation Tool will be used to active FireArrow products. Just like the License Manager, it is also only required to install once on a server.

- Open the folder for Product Activation installation and run “Setup.exe”.

Name	Date modified	Type	Size
 FireArrow.ProductActionvation.Installer	8/25/2010 4:05 PM	Windows Installer ...	537 KB
 FireArrow.ProductActivation	8/25/2010 4:05 PM	Application	184 KB
 FireArrow.ProductActivation.RunAs	8/25/2010 4:05 PM	Application	76 KB
 setup	8/25/2010 4:05 PM	Application	421 KB

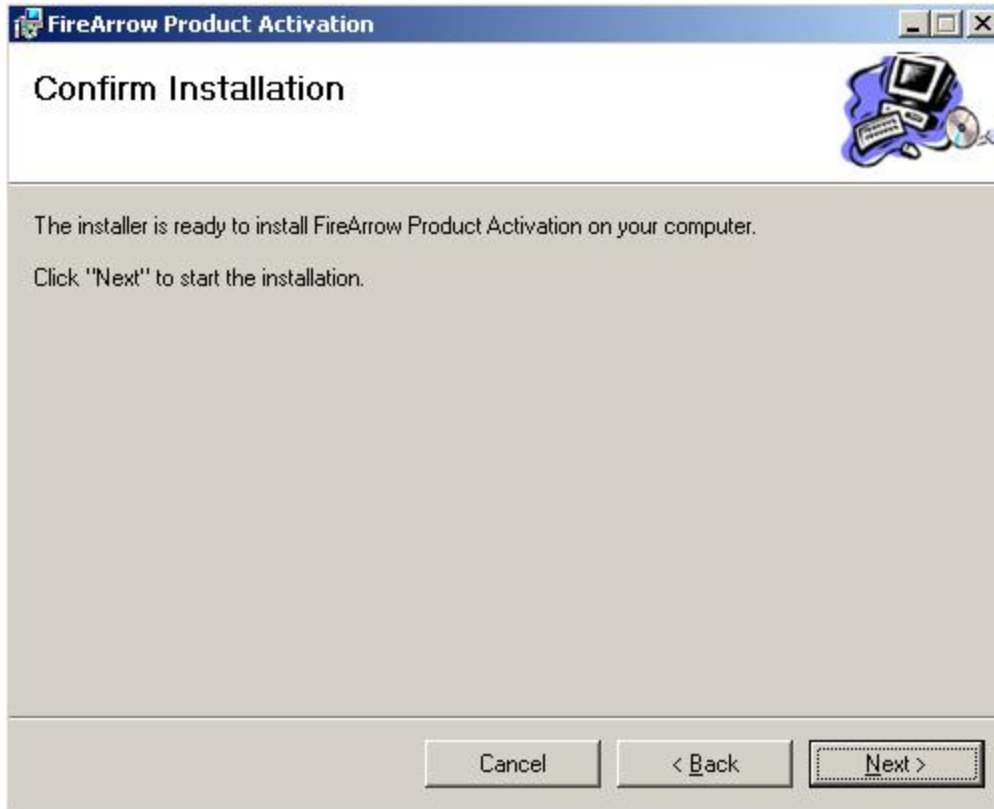

- The setup wizard will be displayed and click “Next” to proceed.

- Select the installation folder, and click 'Next'.

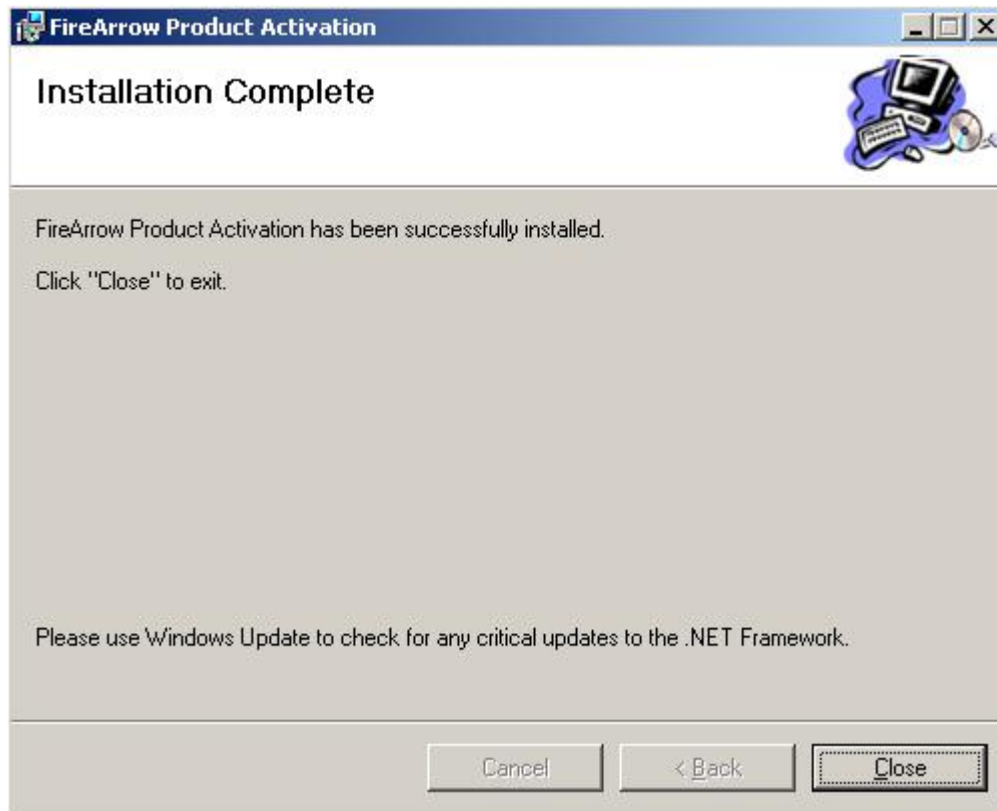

- Click 'Next' to confirm the installation.

- The wizard starts the installation and display the installation progress.

- Installation is completed successfully and clicks “Close” to exit the wizard.

## **News Rotator Web Part Installation**

We provide two installation approaches for News Rotator web part installation. One is to use the installation wizard for automatic installation. The other way is to use STSADM command tool for manual installation. This section describes both approaches in detail.

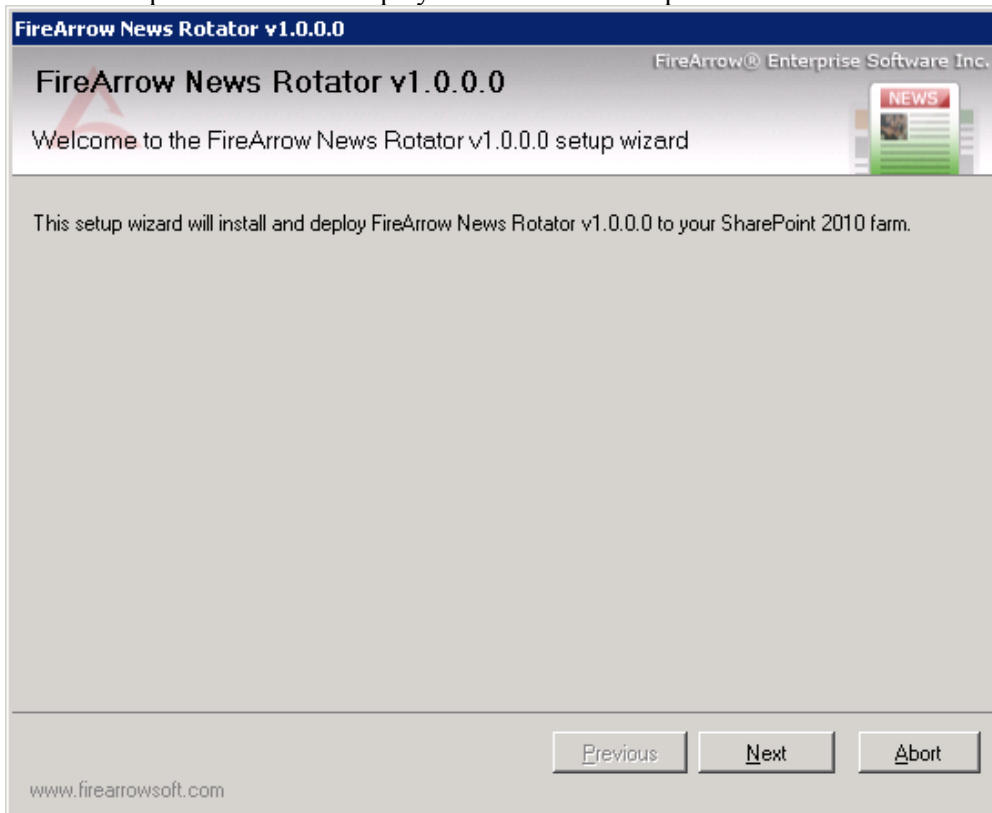

### ***Automatic Installation Approach***

The News Rotator installation package contains the installer file, solution package file, image, and etc. You must be the SharePoint Farm Administrator for a successful installation. Please follow the following steps for installation.

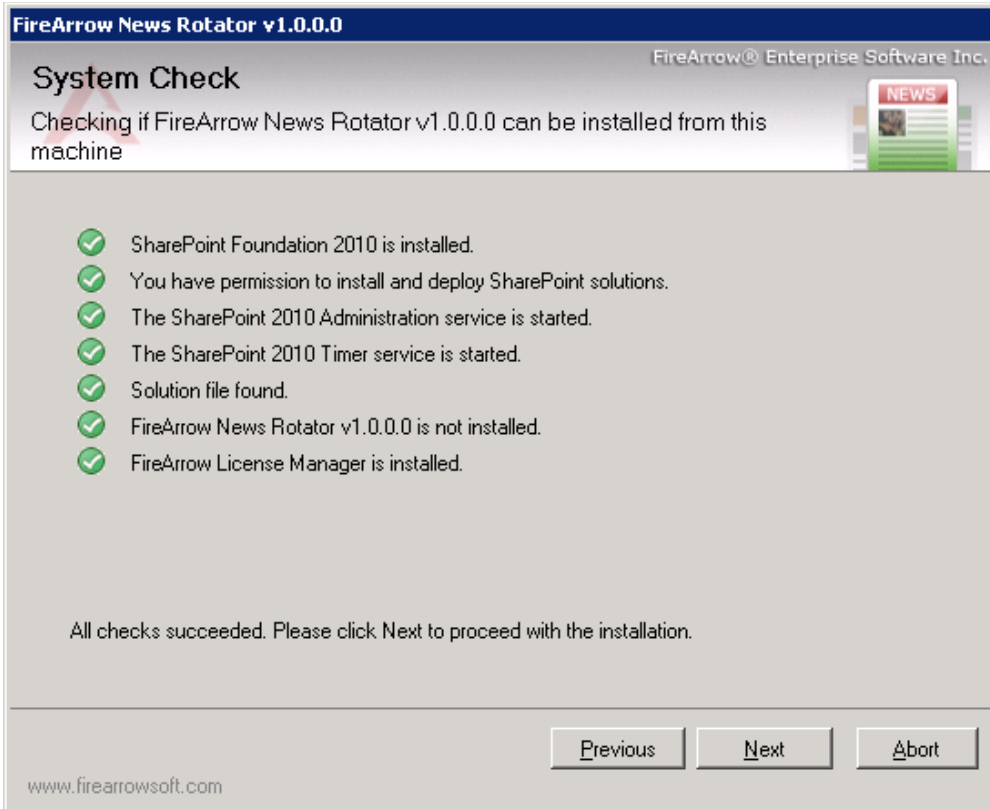

1. Open the folder for NewsRotator installation and double click the “Setup.exe” to start the installation.

Name	Size	Type
 banner	14 KB	JPEG image
 EULA	10 KB	Rich Text Format
 FireArrow.SharePoint.NewsRotator	92 KB	WSP File
 Setup	429 KB	Application
 Setup.exe	2 KB	CONFIG File

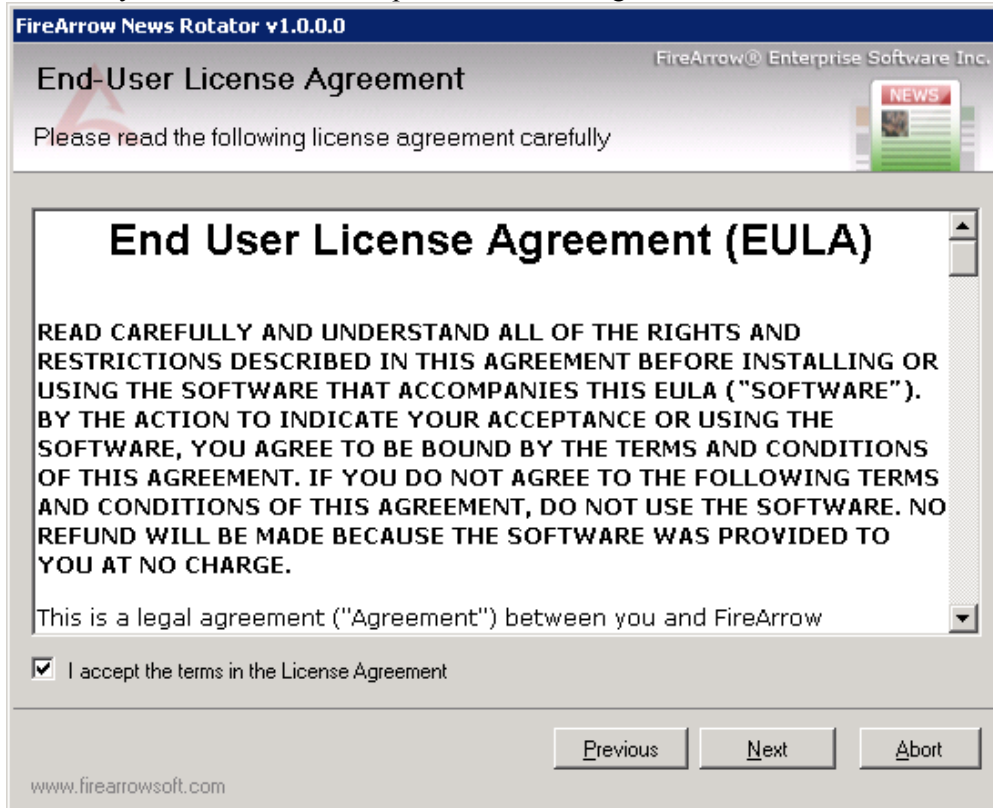

2. The setup wizard will be displayed. Click “Next” to proceed.

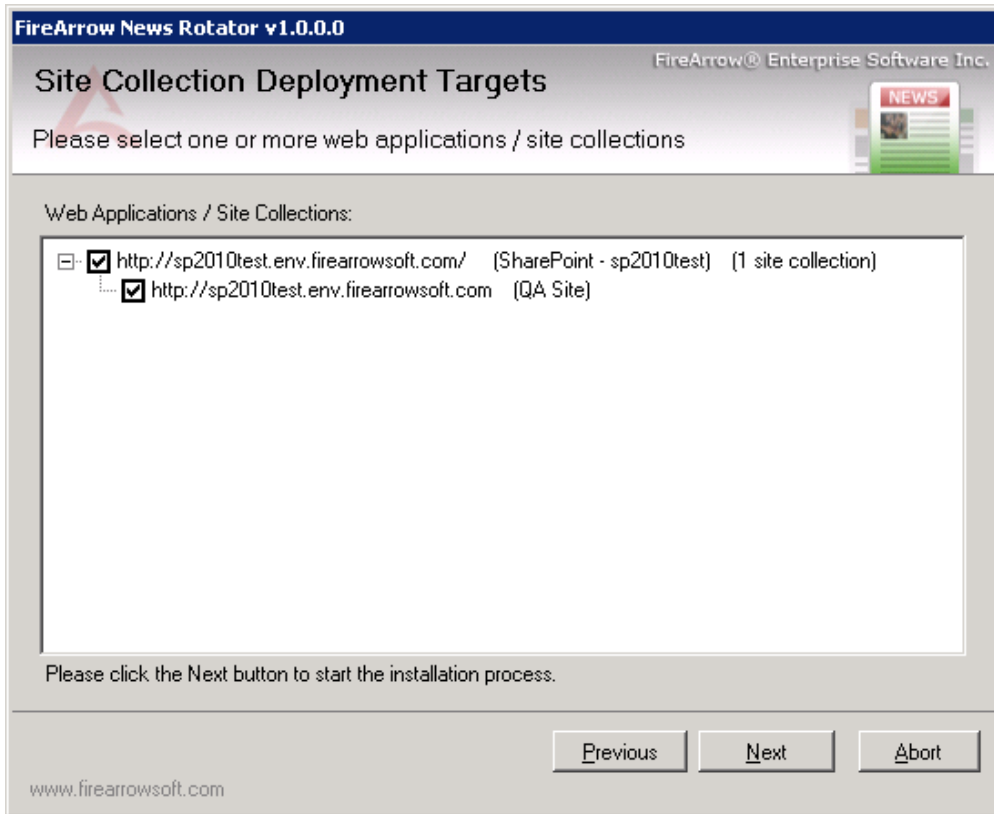

3. Wait for system check to complete and then click “Next”.

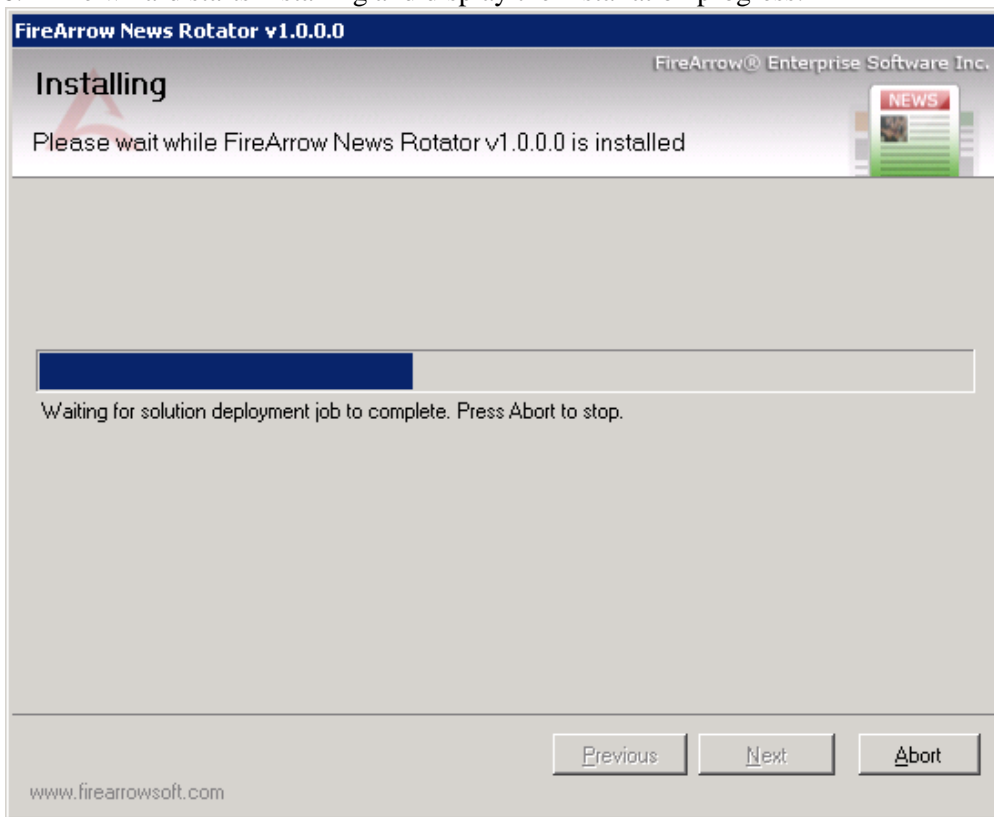

4. After you have read and accepted the License Agreement, click “Next” to continue.

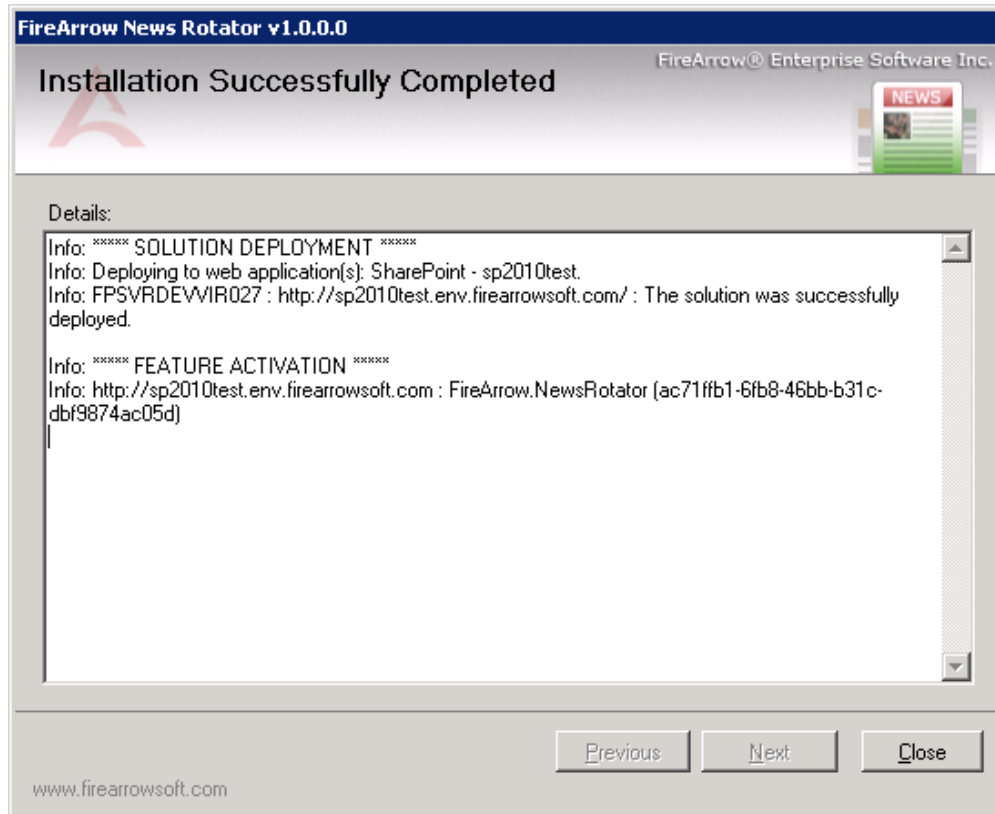

5. Select one or more target web applications and then click "Next".

6. The wizard starts installing and display the installation progress.

7. Installation is completed successfully and clicks “Close” to exit the wizard.

### ***Manual Installation Approach***

The folder for NewsRotator installation contains the solution package which you need for manual

Name	Size	Type
banner	14 KB	JPEG image
EULA	10 KB	Rich Text Format
FireArrow.SharePoint.NewsRotator	92 KB	WSP File
Setup	429 KB	Application
Setup.exe	2 KB	CONFIG File

installation.

The steps for manual installation are as followed:

1. Copy the solution package to the server farm and run following commands to add solutions to the server farm:  
`stsadm.exe -o addsolution -filename "FireArrow.SharePoint.NewsRotator.wsp"`  
`stsadm -o execadmsvcjobs`
2. Then you need to deploy the solution package. You can deploy the solution package either by running STSADM commands or using the SharePoint 3.0 Central Administration web interface.
8. **Option 1: running STSADM commands**

You need to run the following two commands for solution deployment:

- 1) stsadm -o deploysolution -name "FireArrow.SharePoint.NewsRotator.wsp" -immediate -url http://qa.test.FireArrowsoft.com -force -allowCasPolicies

Note: replace the url (http://qa.test.firearrowsoft.com) with your target web application's url.

- 2) stsadm -o execadmsvcjobs

## 9. Option 2: using SharePoint 3.0 Central Administration Interface

- 1) Log into the SharePoint Central Administration. Go to the "System Settings" and select "Manage farm Solutions" under the "Farm Management" section.

- 2) Select the solution "FireArrow.SharePoint.NewsRotator.wsp", and then select Deploy Solution from the Solution Properties.

firearrow.sharepoint.license.wsp	Deployed	Globally deployed.
firearrow.sharepoint.livebanner.wsp	Deployed	http://sp2010test.env.firearrowsoft.com/
firearrow.sharepoint.news.2010.wsp	Deployed	http://sp2010test.env.firearrowsoft.com/
firearrow.sharepoint.newsrotator.wsp	Deployed	http://sp2010test.env.firearrowsoft.com/
firearrow.sharepoint.photoviewer.wsp	Deployed	http://sp2010test.env.firearrowsoft.com/
firearrow.sharepoint.ratingandreview.2010.wsp	Deployed	http://sp2010test.env.firearrowsoft.com/
firearrow.sharepoint.ratingandreviewwebpart.wsp	Deployed	http://sp2010test.env.firearrowsoft.com/

Deploy Solution   Retract Solution   Back to Solutions

Name:	firearrow.sharepoint.newsrotator.wsp
Type:	Core Solution
Contains Web Application Resource:	Yes
Contains Global Assembly:	No
Contains Code Access Security Policy:	Yes
Deployment Server Type:	Front-end Web server
Deployment Status:	Deployed
Deployed To:	http://sp2010test.env.firearrowsoft.com/
Last Operation Result:	The solution was successfully deployed.
Last Operation Details:	FPSVRDEVVIR027 : http://sp2010test.env.firearrowsoft.com/ ; The solution was successfully deployed.
Last Operation Time:	2/24/2011 6:47 PM

- 3) Set the deployment job schedule and choose the target web application where the solution will be deployed.

<p><b>Solution Information</b></p> <p>Information on the solution you have chosen to deploy.</p>	<p>Name: firearrow.sharepoint.newsrotator.wsp</p> <p>Locale: 0</p> <p>Deployed To: http://sp2010test.env.firearrowsoft.com/</p> <p>Deployment Status:</p>
<p><b>Deploy When?</b></p> <p>A timer job is created to deploy this solution. Please specify the time at which you want this solution to be deployed.</p>	<p>Choose when to deploy the solution:</p> <p><input checked="" type="radio"/> Now</p> <p><input type="radio"/> At a specified time:</p> <p>2/25/2011  12 PM  00 </p>
<p><b>Deploy To?</b></p> <p>The solution contains Web application scoped resources and should be deployed to specific Web applications. Please choose the Web application where you want the solution to be deployed.</p>	<p>Choose a Web application to deploy this solution:</p> <p>http://fpsvrdevvir027/ </p> <p><b>Warning:</b> This solution contains a Code Access Security policy. Deploying this solution will change the effective trust policy. Do not proceed unless you trust the solution provider.</p>

After the solution is deployed to target web application, run the command “*iisreset /noforce*” to restart IIS

### 3. Post-Installation Tasks

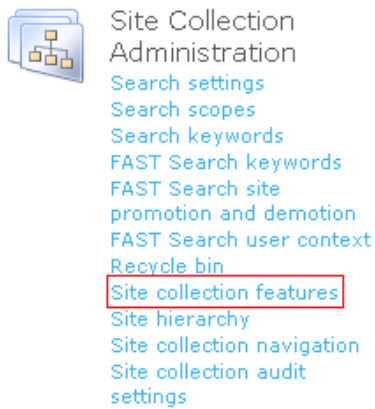

#### Feature Activation

After installation, you need to perform the following steps to active the feature before the web part is ready to use.

1. Go to the Site Settings page: click “Site Actions” → “Site Settings”.

2. Select “Site collection features”.

3. Click “Active” Button to active FireArrow News Rotator Web Part.

	<b>FireArrow Advanced RSS Viewer</b> Provides elegant view styles and dynamic rich features to aggregate and display information from various RSS feeds.	Deactivate	Active
	<b>FireArrow Live Banner Web Part</b> Offers an effortless way to display and manage live banners in SharePoint Sites. It provides a lot of rich features, styles and controls to display image banners from SharePoint picture library.	Deactivate	Active
	<b>FireArrow News Rotator Web Part</b> Provides elegant display styles, dynamic features and flexible configurations to rotate headline news.	Deactivate	Active
	<b>FireArrow News Solution Features</b> Provides customized news library, fields, content types, master pages and page templates to create and manage news articles for a site collection.	Deactivate	Active
	<b>FireArrow Photo Viewer Web Part</b> Provides elegant viewer styles, transition effects and features to display images from a SharePoint picture library.	Deactivate	Active

## 4. Un-installation

You can use FireArrow News Rotator Web Part Installer to uninstall News Rotator Web Part. To uninstall the web part:

- 1) Run the setup.exe on your system.
- 2) Select the radio button for “Remove” and click “Next”, the web part will be uninstalled.

## 5. License Management

The FireArrow News Rotator is allowed to use for 30-days after the installation without license activation. It is always recommended to provision your valid license activation key immediately after the installation is completed. Please go to the FireArrow web site (<http://www.firearrowsoft.com>) to purchase the software in order to obtain the license activation key.

After the software purchase, please email us ([support@firearrowsoft.com](mailto:support@firearrowsoft.com)) the following information in order to generate the product activation code:

1. Product key
2. Order confirmation #

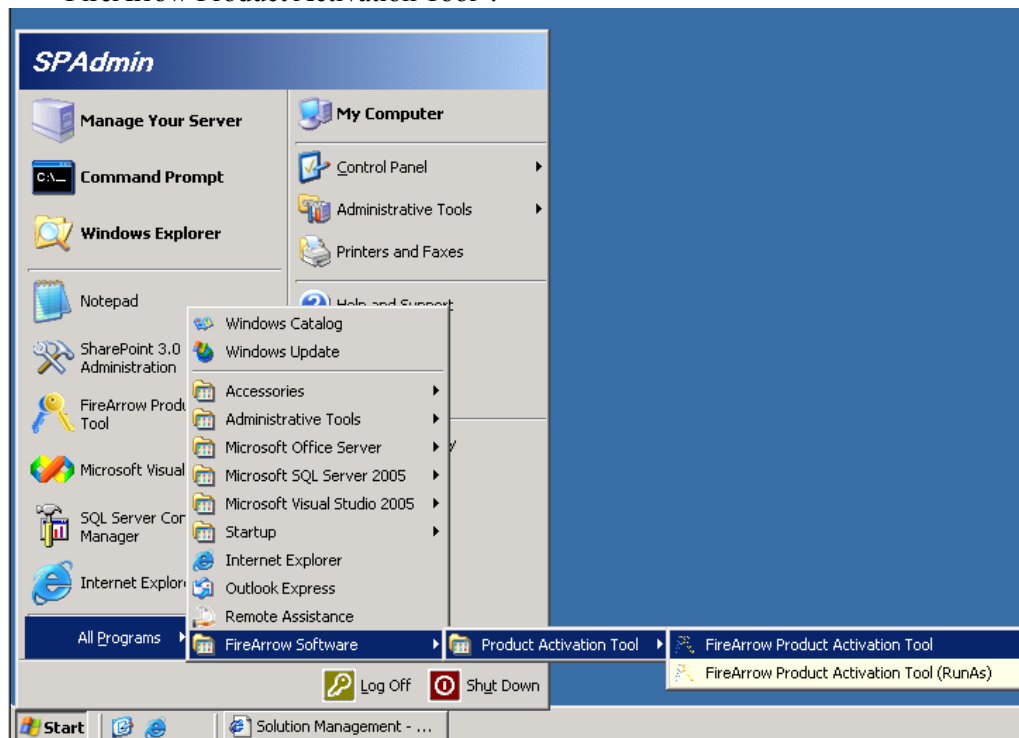

We will email you the product activation key.

You can obtain the product key information through the Product Activation Tool. Please follow steps in the below section to obtain the product key and complete the license activation.

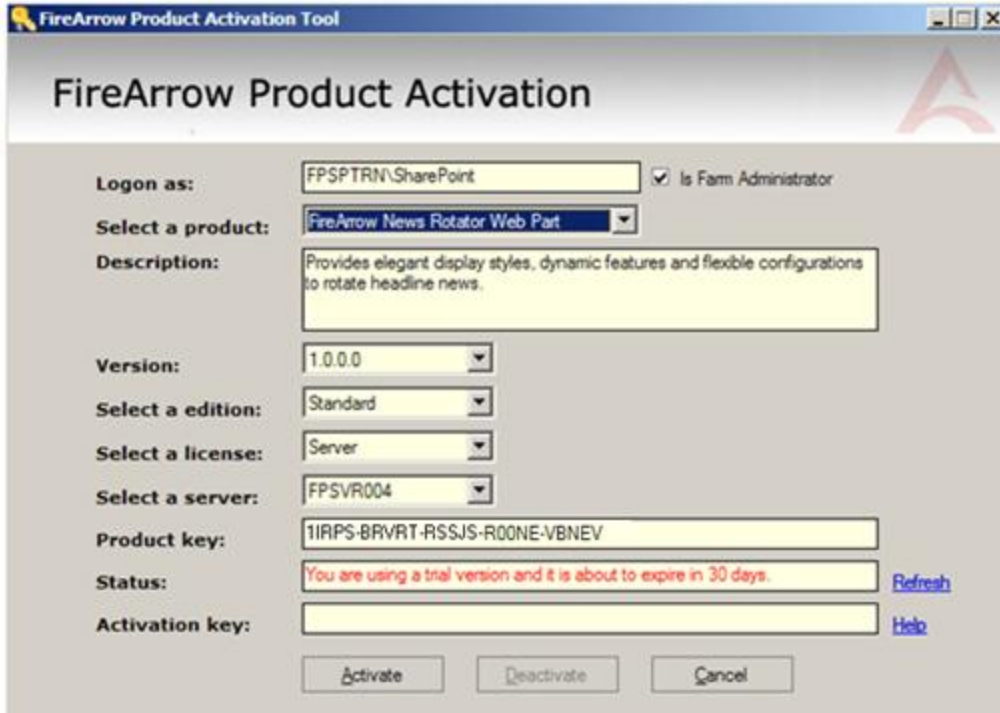

### License Activation

After the Product Activation Manager is successfully installed, follow below steps to obtain the product key information and activate the FireArrow product license in your server.

- Go to “Start” menu→All Programs→FireArrow Software→Product Activation Tool and click “FireArrow Product Activation Tool”.

- Select the ‘FireArrow News Rotator’ from the product dropdown list and the corresponding product information will be displayed in the form, including the “Product Key” information. You can also see the license status from the “Status” field. Before activation, the status will indicate you are using a trial version.

- Once you get the Activation Key, enter it into the ‘Activation Key’ field, and click ‘Activate’ button.

- Click OK in the pop-up window to confirm the activation. And you will notice that the message in the Status field is changed to “The product is activated”. The product activation is completed.

### Key to areas on interface:

1. Set news source
2. Set display style
3. Set display size
4. Set display alignment
5. Set auto-play mode and speed
6. Set the maximum navigable icons
7. Set transition effects
8. Set transition interval time
9. Map news properties
10. Add hyperlink

## 2.1 Setting News Source

The FireArrow News Rotator Web Part allows you to select news from a SharePoint list or library at the view and folder level.

The screenshot shows the 'News Rotator Settings' dialog box. It contains the following fields and controls:

- Select source news through the following settings:**
  - \*Required Fields.**
  - Site Url:\*** A text input field containing 'http://spftest.env.firearrows' and a 'Get' button.
  - Available Libraries:\*** A dropdown menu with 'NewsLibrary' selected.
  - Available Views:\*** A dropdown menu with 'All Documents' selected.
  - Available Folders:\*** A dropdown menu with '/' selected.
  - Include Sub Folders**
  - Display Images from:\*** A dropdown menu with 'Page Image' selected.

**Site Url:** Enter the site url where the news source is from and click “Get” button.

**Available Libraries:** This dropdown list displays all the available libraries from the source site. You can select the target library from the list.

This image shows a close-up of the 'Available Libraries' dropdown menu. The menu is open, showing a list of libraries: NewsLibrary, NewsLibs, Pictures, Shared Documents, Site Assets, and Site Pages. 'NewsLibrary' is currently selected and highlighted in blue.

**Available Views:** This dropdown list displays available views from the selected target library. You can use views to organize the news you want to display through the news rotator web part.

This image shows a close-up of the 'Available Views' dropdown menu. The menu is open, showing a list of views: All Documents and Valid News. 'Valid News' is currently selected and highlighted in blue.

**Available Folders:** This dropdown list display available folders from the selected view in the target library. With this option, you can display news only from a selected folder. If no folder is selected, all news from the selected view will be displayed.

**Include Sub Folders:** This checkbox is checked by default to include news from the sub folders. News Rotator web part will display all news from current directory and sub-folders. If it is not checked, only news in the current path will be displayed.

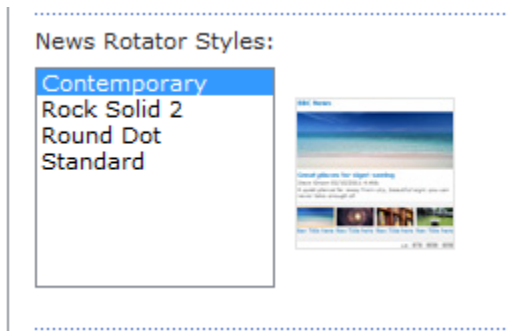

**Display Image From:** This dropdown list allow you to choose the headline news images to display in the web part. You can choose a column which contains the link to the image or “Current Item” option if the image is stored in current list which is a picture library.

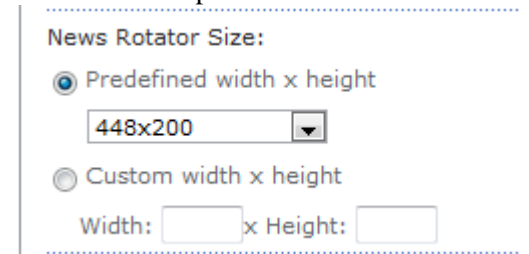

## 2.2 Setting News Rotator Style

News Rotator Web Part provides four popular display styles with different configuration options. Please refer to the next section "News Rotator Display Styles" for detail discussion about each style.

## 2.3 Setting Displaying Size

You can select the pre-defined size for the selected style or set its own size. Each style has different default predefined sizes.

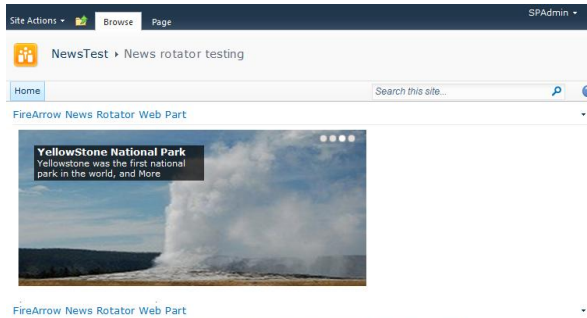

## 2.4 Setting Display Alignment

You can adjust the display alignment of the news rotator in the web part zone by selecting one of the alignment options below.

Display Alignment:

Left  Center  Right

“Left” alignment →

“Center” alignment →

“Right” alignment →

## 2.5 Enabling Auto-Play Feature

You can enable the auto-play feature by checking the “Auto Play” checkbox and setting a desired time interval.

Auto Play:

Interval:  (in seconds)

## 2.6 Configuring Navigation

You can control the maximum number of navigation icon displayed in the News Rotator by entering a number in this field.

Maximum navigable icons:

Maximum number of navigable icons = 6

Maximum number of navigable icons = 4

## 2.7 Setting Transition Effect

You can choose a transition effect and set transition time when navigating among news stories.

Transition Effect:  
 ▼  
 Transition effect with \* is for IE browser only

---

Transition Time:  
 (in milliseconds)

The News Rotator web part provides 21 different transition effects (see image below). Transition effect with \* is for IE browser only. ( see transition effect in Appendix 1 )

Transition Effect:  
 ▼  
 Transition effect with \* is for IE browser only

- Zigzag\*

## 2.8 Mapping News Properties

FireArrow News Rotator provides a feature to display news information in the web part by mapping property columns of the selected library to the pre-defined areas.

Mapping Image Properties:	
Section	From
<input checked="" type="checkbox"/> Title:	Title
<input checked="" type="checkbox"/> Author:	Byline
<input checked="" type="checkbox"/> Date:	Article Date
<input checked="" type="checkbox"/> Description:	Summary
<input checked="" type="checkbox"/> Nav Title:	Title

"Section": pre-defined area in the user interface of selected News Rotator style.

"From": available columns from the news source library. Available columns are subject to the selected view.

The mapping options vary slightly for different display styles. Please refer to the next section for detail discussion.

## 2.9 Adding Hyperlink

FireArrow News Rotator allows adding associated hyperlink for a news story. You can add news detail page address by mapping to a column of source list which contains URL information or "Current Items".

<input checked="" type="checkbox"/> Add Hyperlink:	
Address from:	<Current Item:
Text in desc:	More
<input checked="" type="checkbox"/> Add to title	
<input checked="" type="checkbox"/> Add to image	

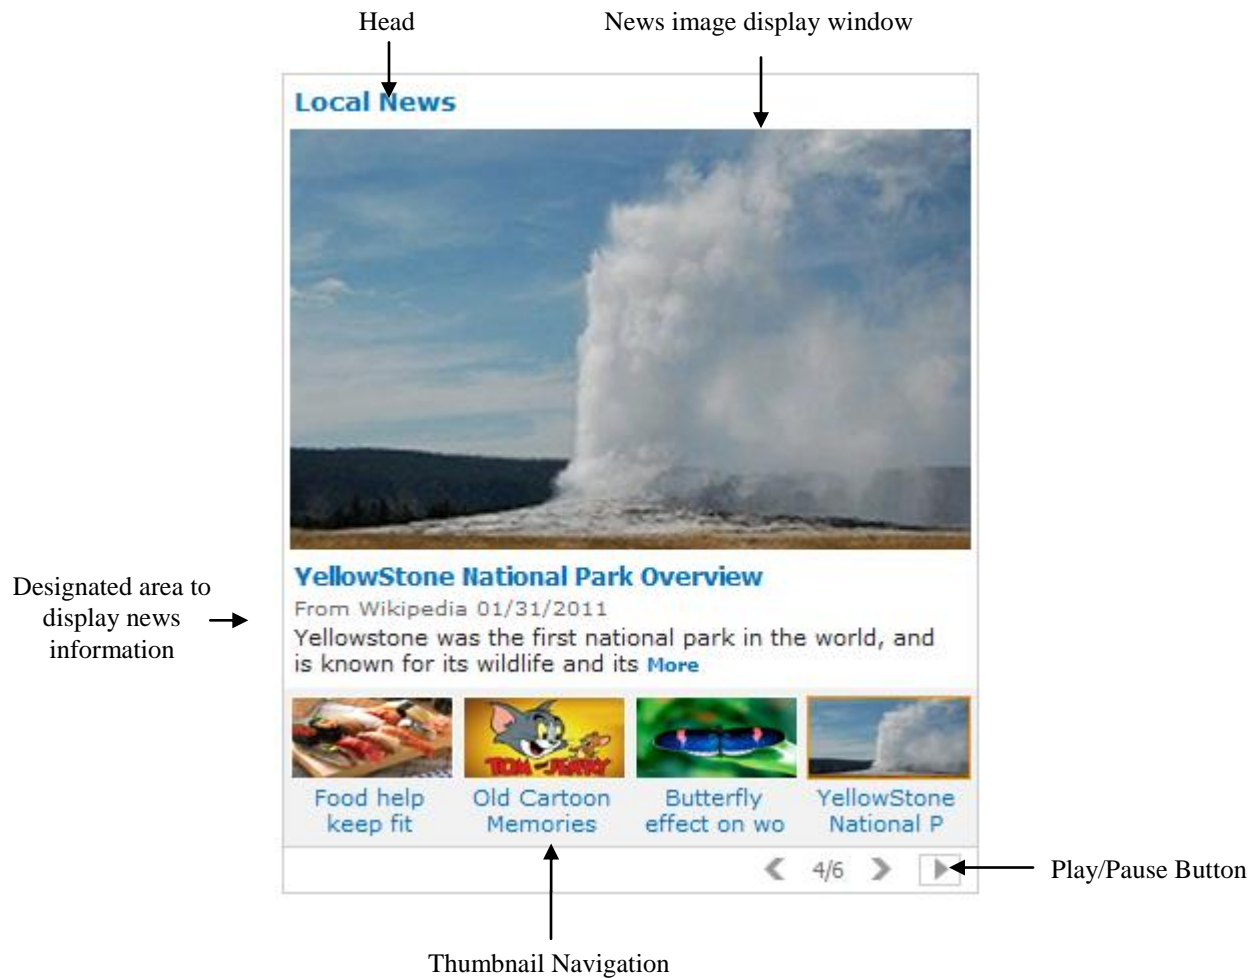

- Address From: available columns from the news source library. They are subject to the selected view.
- Text in desc: text displayed for the hyperlink in the description section.
- Add to title: add the hyperlink to the title and make the title clickable.
- Add to image: allow the hyperlink to the image and make the image clickable.

### 3. News Rotator Display Styles

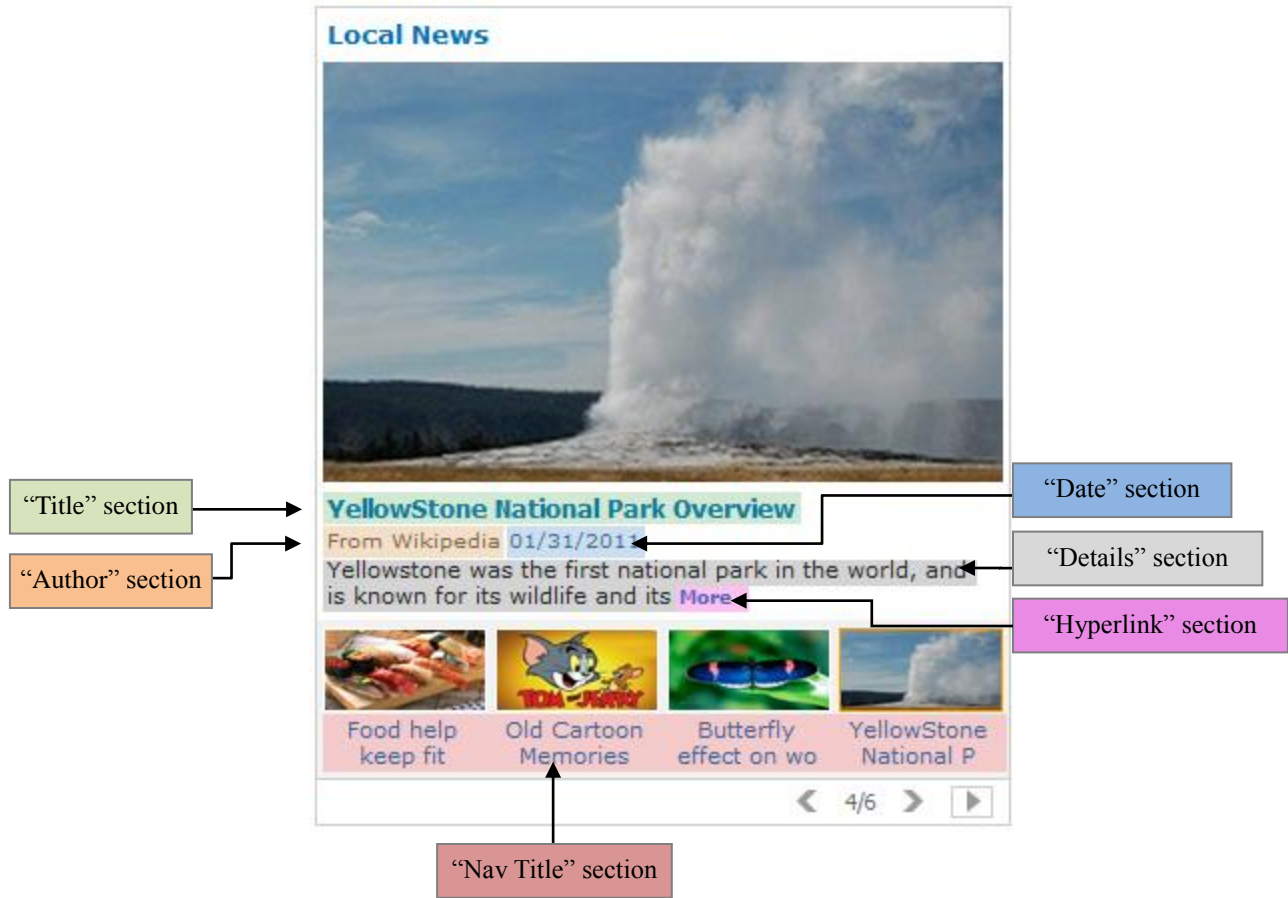

FireArrow News Rotator provides four display styles. Each style has distinct look and feel and some unique settings. This section describes each style in detail.

#### 3.1 Contemporary

Below the image shows the appearance of the “Contemporary” style.

The designated area is designed to display additional news information. It is divided into several sections to display the information from mapped columns. Below image shows the layout of these sections.

Each section can be mapped to a column of the news source list through web part setting.
